Supporting Information for the application to amend the Department of Transport and Main Roads Environmental Authority for extraction, EPPR00770213. This application is for the removal of sites within the Central West District, in Diamantina Shire.

A. INTRODUCTION

The Central West District of the Department of Transport and Main Roads (TMR) comprises of seven regional council areas being Barcaldine, Barcoo, Blackall-Tambo, Boulia, Diamantina, Longreach and Winton. The Central West District is supported by a regional local workforce that has worked and lived within the area for many years. The longevity of district officers has been an essential factor in determining the history of extraction throughout the district with knowledge extending back to the early 1980's.

In general, the district has outsourced the supply of gravel to others who are also tasked with the responsibility of obtaining the relevant approvals and licences for this activity. The flood recovery works which commenced in 2010/2011 identified that a lack of suitable gravels was a supply risk for the massive program of restoration works. As such, hundreds of potential gravel sites were identified in strategic locations around the region. These sites were later recorded on the department's Central Queensland Region's Environmental Authority EPPR00770213.

This amendment application is requesting the removal of 37 sites within Diamantina Shire that are listed on TMRs EA EPPR00770213. All the sites are listed within nine lot on plans on the EA. All but one of these lot on plans have since had changes to their boundaries and lot on plan description resulting in all 37 EA sites sitting within one of eight lot on plans. These eight lot on plans are listed in Section B and represented within the figure in Section C.

All sites have been assessed by TMR's consultant, Desert Channels Solutions (DCS) and given a unique DCS number. These sites have been correlated with the EA listing where possible. Where this is not clear, multiple sites and/or sites in adjacent land parcels have also been assessed. Reports for each site are reviewed and interrogated with local TMR officers with extensive historical knowledge of TMRs program of works and gravel sources. Mapping, contract documentation, historical aerials and title searches have also been sourced. Based on these investigations, a statement of TMR use/Non-use has been made in writing for each site as follows:

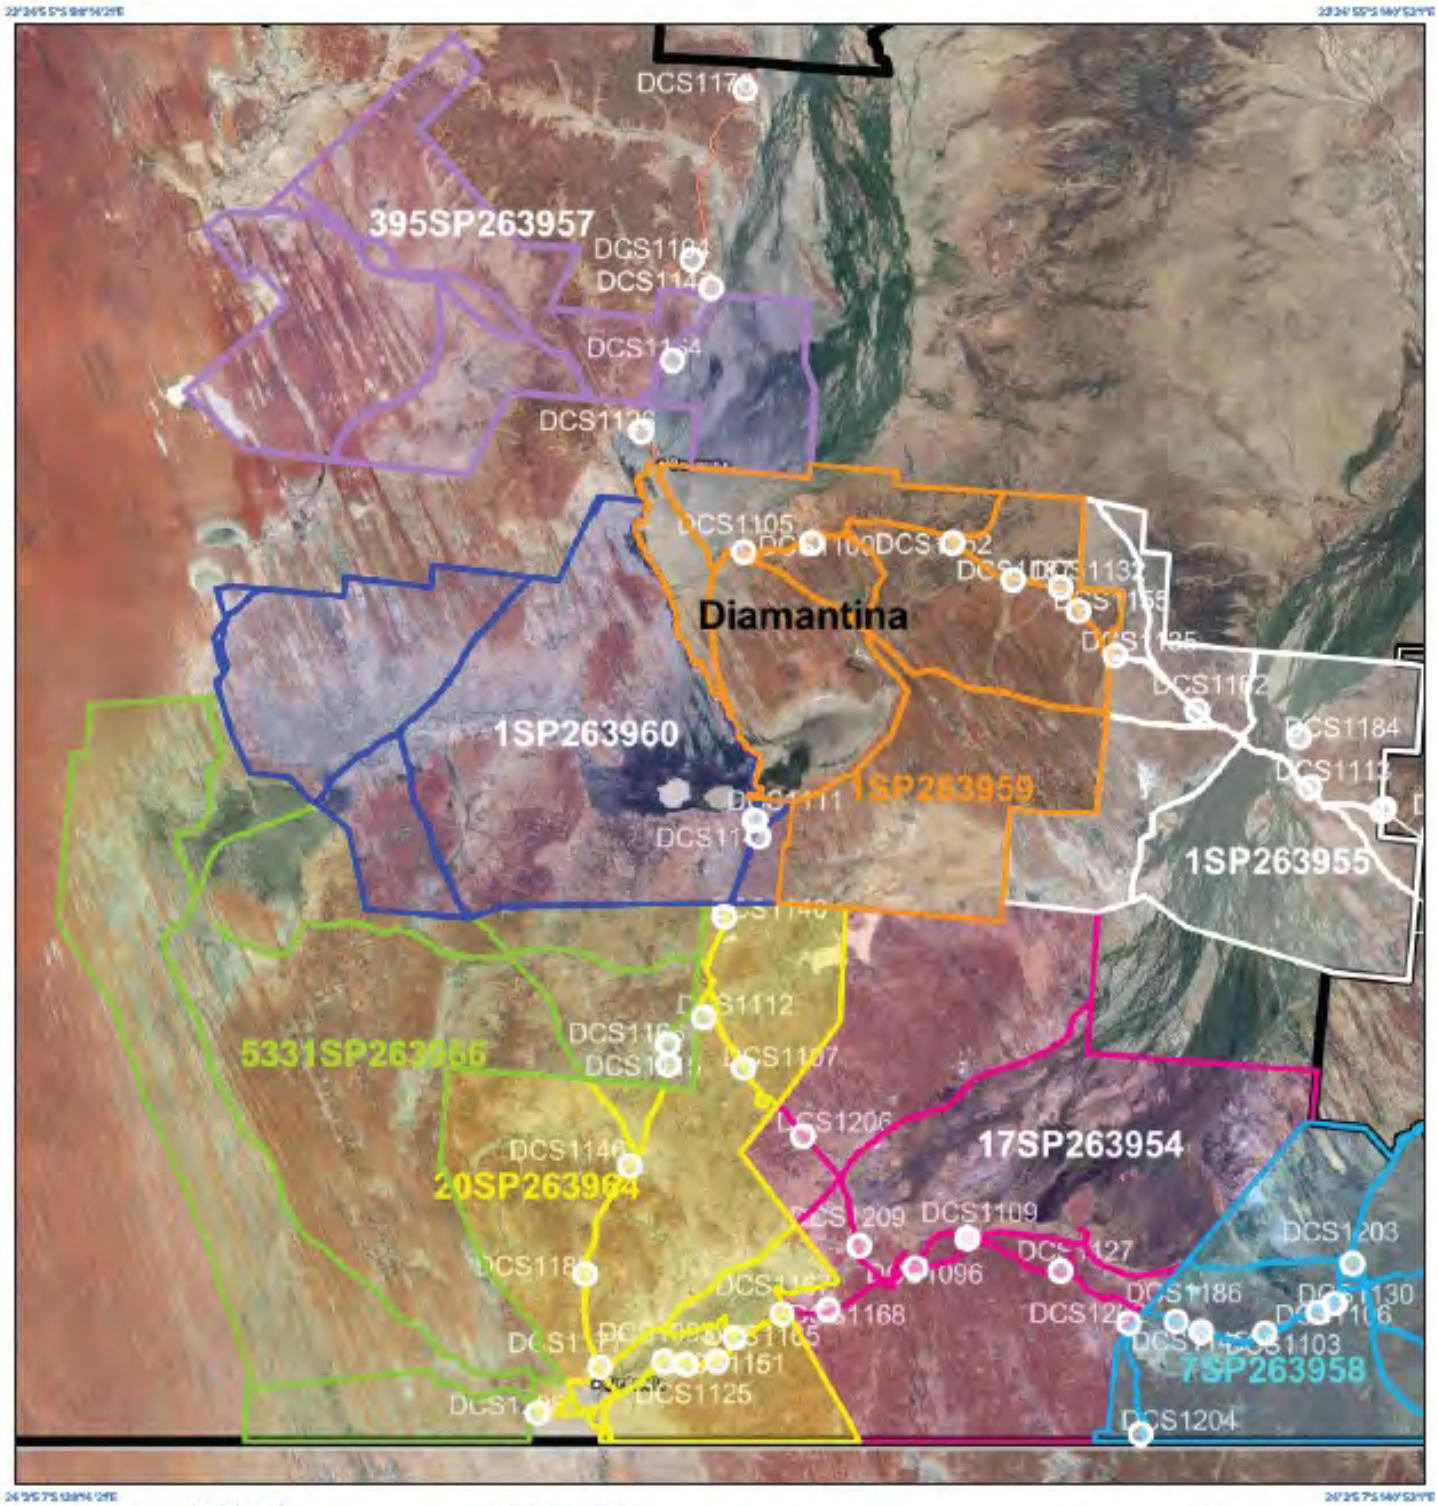

Option 1: TMR has never undertaken extraction under the EA on this site (where TMR is certain)
Option 2: As far as TMR is able to determine, TMR has never undertaken extraction under the EA on this site (where there is a degree of uncertainty), OR
Option 3: TMR has undertaken extraction on this site.

Each site has been discussed with Gareth Opperman (Environmental Officer – Department of Environment and Sciences) prior to this application being lodged with a record of this discussion kept within the attached excel spreadsheet titled "Batch 3 CWD Summary". This spreadsheet also provides a summary of each site including coordinates, lot on plan details, distance to the nearest state-controlled road, confirmation of other ERA 16 operators, property tenure, and an estimate of volume extracted. This pdf document includes photos of each site and additional site maps where required. These are organised in the same order that sites are discussed within the above excel spreadsheet.

Subject: Copie Pit on TMRs EA in Diamantina

Hi Gary and Tony,

I hope the New Year is treating you both well?

I am getting in touch about a pit in Diamantina. It is listed on our EA as Copie Pit and is one of 12 pits within Lot 20 Plan SP255335. This lot on plan no longer exists and is now known as 20SP263964.

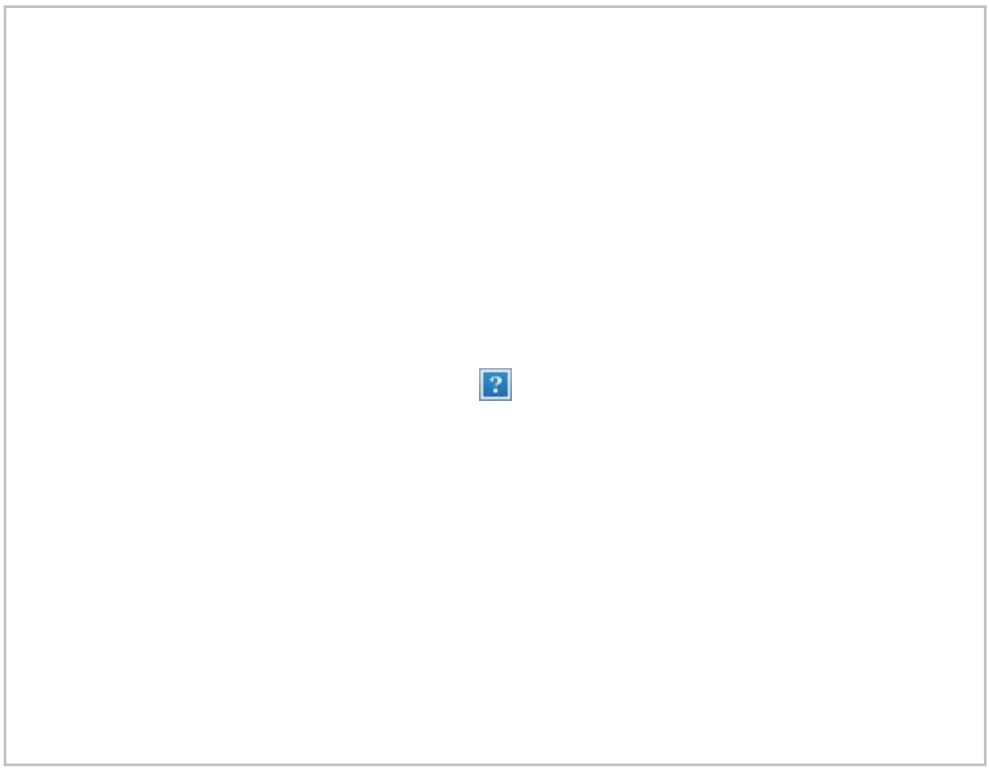

Is the district aware of a pit of this name and it's possible location?

I have some theories.

- There is a precedence within EAs for spelling variations. Could Copie be Kopi?
- There is a Kopi Gravel Pit referred to in council records (however not listed on their EA). Kopi Gravel Pit is on the Sandringham – Ethabuka Road at chainage 20.19. This site is listed well north of lot 20 plan SP263964.
- There is also a Kopi Road within Birdsville just east of the northern tip of the airstrip. There appears to be a site that might be a pit just south of this. Could this be Copie or Kopi Pit?
- We have one unclaimed pit assessed by DCS within 20SP263964 which might be Copie Pit. It's DCS1107 off council Cacoory – Stony Crossing Rd.

Any ideas?

Has TMR extracted from any of these sites?

I've attached maps of the above.
