Permit

Environmental Protection Act 1994

Environmental authority EA0002378

This environmental authority is issued by the administering authority under Chapter 5 of the Environmental Protection Act 1994.

Environmental authority number: EA0002378

Environmental authority takes effect on the day the authority is issued.

The anniversary date of the environmental authority is 09 July each year. The payment of the annual fee will be due each year on this day.

Environmental authority holder

Name	Registered address
Broken Car Collection Pty Ltd	441 Wondall Road TINGALPA QLD 4173

Environmentally relevant activity and location details

Environmentally relevant activity	Location
ERA 62 - Resource recovery and transfer facility operation 1: Operating a facility for receiving and sorting, dismantling, baling or temporarily storing (a) scrap metal, non-putrescible wasteor green waste only	50 Macbarry Place Rocklea QLD 4106 – Lot 26 on SP208438

Additional information for applicants

Environmentally relevant activities

The description of any environmentally relevant activity (ERA) for which an environmental authority (EA) is issued is a restatement of the ERA as defined by legislation at the time the EA is issued. Where there is any inconsistency between that description of an ERA and the conditions stated by an EA as to the scale, intensity or manner of carrying out an ERA, the conditions prevail to the extent of the inconsistency.

An EA authorises the carrying out of an ERA and does not authorise any environmental harm unless a condition stated by the EA specifically authorises environmental harm.

A person carrying out an ERA must also be a registered suitable operator under the *Environmental Protection Act 1994* (EP Act).

ABN 46 640 294 485

Queensland Government

Contaminated land

It is a requirement of the EP Act that an owner or occupier of contaminated land give written notice to the administering authority if they become aware of the following:

- the happening of an event involving a hazardous contaminant on the contaminated land (notice must be given within 24 hours); or
- a change in the condition of the contaminated land (notice must be given within 24 hours); or
- a notifiable activity (as defined in Schedule 3) having been carried out, or is being carried out, on the contaminated land (notice must be given within 20 business days);

that is causing, or is reasonably likely to cause, serious or material environmental harm.

For further information, including the form for giving written notice, refer to the Queensland Government website www.qld.gov.au, using the search term 'duty to notify'.

Take effect

Please note that, in accordance with section 200 of the EP Act, an EA has effect:

a) if the authority is for a prescribed ERA and it states that it takes effect on the day nominated by the holder of the authority in a written notice given to the administering authority-on the nominated day; or

b) if the authority states a day or an event for it to take effect-on the stated day or when the stated event happens; or

c) otherwise - on the day the authority is issued.

However, if the EA is authorising an activity that requires an additional authorisation (a relevant tenure for a resource activity, a development permit under the *Planning Act 2016* or an SDA Approval under the *State Development and Public Works Organisation Act 1971*), this EA will not take effect until the additional authorisation has taken effect.

If this EA takes effect when the additional authorisation takes effect, you must provide the administering authority written notice within 5 business days of receiving notification of the related additional authorisation taking effect.

If you have incorrectly claimed that an additional authorisation is not required, carrying out the ERA without the additional authorisation is not legal and could result in your prosecution for providing false or misleading information or operating without a valid environmental authority.

Obligations under the *Environmental Protection Act 1994*

In addition to the requirements found in the conditions of this environmental authority, the holder must also meet their obligations under the EP Act, and the regulations made under the EP Act. For example, the holder must comply with the following provisions of the Act:

- general environmental duty (section 319)
- duty to notify environmental harm (section 320-320G)
- offence of causing serious or material environmental harm (sections 437-439)
- offence of causing environmental nuisance (section 440)
- offence of depositing prescribed water contaminants in waters and related matters (section 440ZG)
- offence to place contaminant where environmental harm or nuisance may be caused (section 443)

Other permits required

This permit only provides an approval under the *Environmental Protection Act 1994*. In order to lawfully operate you may also require permits / approvals from your local government authority, other business units within the department and other State Government agencies prior to commencing any activity at the site. For example, this may include permits / approvals with your local Council (for planning approval), the Department of Transport and Main Roads (to access state controlled roads), the Department of Natural Resources, Mines and Energy (to clear vegetation), and the Department of Agriculture and Fisheries (to clear marine plants or to obtain a quarry material allocation).

Development Approval

This permit is not a development approval under the *Planning Act 2016*. The conditions of this environmental authority are separate, and in addition to, any conditions that may be on the development approval. If a copy of this environmental authority is attached to a development approval, it is for information only, and may not be current. Please contact the Department of Environment and Science to ensure that you have the most current version of the environmental authority relating to this site.

Conditions of environmental authority

General	
G1	All reasonable and practicable **measures** must be taken to prevent or minimise environmental harm caused by the activities.
G2	Any breach of a condition of this environmental authority must be reported to the **administering authority** as soon as practicable within 24 hours of becoming aware of the breach. **Records** must be kept including full details of the breach and any subsequent actions taken.
G3	Activities conducted under this environmental authority must be conducted in accordance with the following limitations: 1. The **activity** can only receive intact or partly disassembled automotive equipment, including intact motor vehicles. 2. All dismantling of vehicles and removal of vehicle fluids must be undertaken within the covered workshop on site. 3. Only decontaminated car bodies can be stored on the car racking system at the rear of the site. 4. The activity must be undertaken generally in accordance with the Site Plan depicted in Appendix A.
G4	Written procedures must be developed and documented within three months of the environmental authority taking effect that: a) identify all potential risks to the environment from the **activity**, including during and outside routine operations, during closure and in an emergency; and b) identify **measures** to prevent or minimise the potential for environmental harm for each of the potential risks identified; and c) establish an inspection and maintenance program for plant and equipment including calibration and servicing that is in accordance with manufacturer's instructions; and d) establish a staff training program on obligations under this environmental authority and the *Environmental Protection Act 1994* to be conducted as part of staff inductions and at least annually; and e) establish processes to review environmental risks, incidents, performance and complaints.
G5	Written procedures required by condition G4 must be: a) implemented; and b) reviewed at least annually; and c) provided to the **administering authority** upon request at the time and in the format requested.
G6	For plant and equipment, all **measures** necessary to comply with the conditions of this environmental authority must be:

	a) installed, operated and maintained in a proper and effective manner; and b) in accordance with condition G4.
G7	All **records** must be kept for a period of at least five years and provided to the **administering authority** upon request.
G8	Chemicals, waste fuels and oils in containers of greater than 15 litres must be stored within a **secondary containment system above the site flood level or in underground sealed tanks.**
G9	All waste tyres & batteries must be stored within the covered workshop.
G10	When required by the **administering authority**, monitoring must be undertaken in the manner prescribed by the **administering authority** to investigate a complaint of environmental harm, including **environmental nuisance**, arising from the **activity**. The monitoring data and an analysis of the results must be provided within 10 business days to the **administering authority** upon its request.
	Air
A1	Other than as permitted within this **environmental authority,** odours or airborne contaminants must not cause **environmental nuisance** to any **sensitive place** or **commercial place**.
A2	Contaminants must not be released to air from any point source.
A3	Dust and particulate matter emissions must not exceed the following concentrations at any **sensitive place** or **commercial place**: a) dust deposition of 120 milligrams per square metre per day, when monitored in accordance with Australian Standard AS 3580.10.1 (or more recent editions); or b) a concentration of particulate matter with an aerodynamic diameter of less than 10 micrometre (µm) (PM_{10}) suspended in the atmosphere of 50 micrograms per cubic metre over a 24 hour averaging time, when monitored in accordance with Australian Standard AS 3580.9.6 (or more recent editions) or any other method approved by the administering authority.
A4	The servicing, repair, maintenance and dismantling of motor vehicles must: a) prevent the emission of ozone depleting substances; and b) recover all refrigerant gases prior to the dismantling of air conditioning units.
	Land
L1	Contaminants must not be released to **land.**
	Noise
N1	Other than as permitted within this **environmental authority,** noise generated by the **activity** must not cause **environmental nuisance** to any **sensitive place** or **commercial place.**

N2

Noise from the **activity** must not include **substantial low frequency noise** components and must not exceed the levels identified in *Table 1 – Noise limits* and the associated requirements at any nuisance **sensitive place** or **commercial place**.

Table 1 – Noise limits

Noise level measured in dB(A)	Monday to Saturday			Sunday and Public Holidays		
	7am–6pm	6pm–10pm	10pm–7am	9am–6pm	6pm–10pm	10pm–9am
	Noise measured at the nearest sensitive place					
$L_{Aeq\ adj,\ 1\ hr}$	Background +3	Background +0	Background +0	Background +0	Background +0	Background +0
$L_{Amax,\ 1\ hr}$	--	--	47 dB(A)	--	--	47 dB(A)
	Noise measured at a commercial place					
$L_{Aeq\ adj,\ 1\ hr}$	Background +5	Background +0	Background +0	Background +0	Background +0	Background +0

Associated requirements

1. Limits are applied at the **sensitive** and **commercial place**.
2. All monitoring devices must be calibrated and maintained according to the manufacturer's instruction manual.
3. Any monitoring must be in accordance with the most recent version of the **administering authority's** *Noise Measurement Manual*.
4. Any monitoring of noise emissions from the **activity** must be undertaken when the **activity** is in operation.
5. Monitoring must include:
   i. $L_{Aeq\ adj,\ T}$;
   ii. **Background** noise (**Background**) as $L_{A\ 90,\ adj,\ T}$;
   iii. $L_{Amax,\ T}$;
   iv. The level and frequency of occurrence of any impulsive or tonal noise;
   v. Atmospheric conditions including wind speed and direction;
   vi. Effects due to extraneous factors such as traffic noise; and
   vii. Location, date and time of recording.
6. All monitoring must be performed by an **appropriately qualified person(s)**.

Waste

W1

All waste generated in carrying out the **activity** must be lawfully reused, recycled or removed to a facility that can lawfully accept the waste.

W2

Incompatible wastes must not be mixed in the same container or waste storage area.

Water

WT1

Contaminants must not be released to **waters**.

WT2

An appropriately quality person(s) must monitoring and record all indicators required by *Table 2 – Bio-retention Release Monitoring,* for the first 24 months from the take effect date of this environmental authority.

Table 2 – Bio-retention Release Monitoring

Release Point Description	Quality Characteristic (units)	Minimum Monitoring Frequency
Bio-retention basin release point	pH	Within 12 hours of release and at least monthly when monitoring.
	Turbidity (NTU)	
	Electrical Conductivity (µS/cm)	
	Total Nitrogen (TN) and Total Phosphorus (TP) (µg/L)	

Associated monitoring requirements

1. Monitoring must be in accordance with the methods prescribed in the current edition of the **administering authority's** Water Quality Sampling Manual.
2. Samples must be taken using representative samples.
3. All determinations must employ analytical practical quantification limits sufficiently low enough to enable comparisons to be made against water quality objectives/limits relevant to the particular water quality characteristic.
4. Monitoring must be undertaken during a release as per the frequency stated.
5. All monitoring devices must be correctly calibrated and maintained.

Definitions

Key terms and/or phrases used in this document are defined in this section. Where a term is not defined, the definition in the *Environmental Protection Act 1994*, its regulations or environmental protection policies must be used. If a word remains undefined it has its ordinary meaning.

Activity means the environmentally relevant activities, whether resource activities or prescribed activities, to which the environmental authority relates.

Administering authority means the Department of Environment and Science or its successors or predecessors.

Environmental nuisance means as defined under Chapter 1 of the *Environmental Protection Act 1994*.

Commercial place means a place used as a workplace, an office or for business or commercial purposes and includes a place within the curtilage of such a place reasonably used by persons at that place.

Incompatible waste means waste that may chemically react when:

1. placed in proximity to other wastes; and/or
2. mixed with other wastes.

Land does not include **waters**.

Measures have the broadest interpretation and includes plant, equipment, physical objects, monitoring, procedures, actions, directions and competency.

Records include breach notifications, written procedures, analysis results, monitoring reports and monitoring programs required under a condition of this authority.

Secondary containment system means a system designed, installed and operated to prevent any release of contaminants from the system, or containers within the system, to land, groundwater, or surface waters.

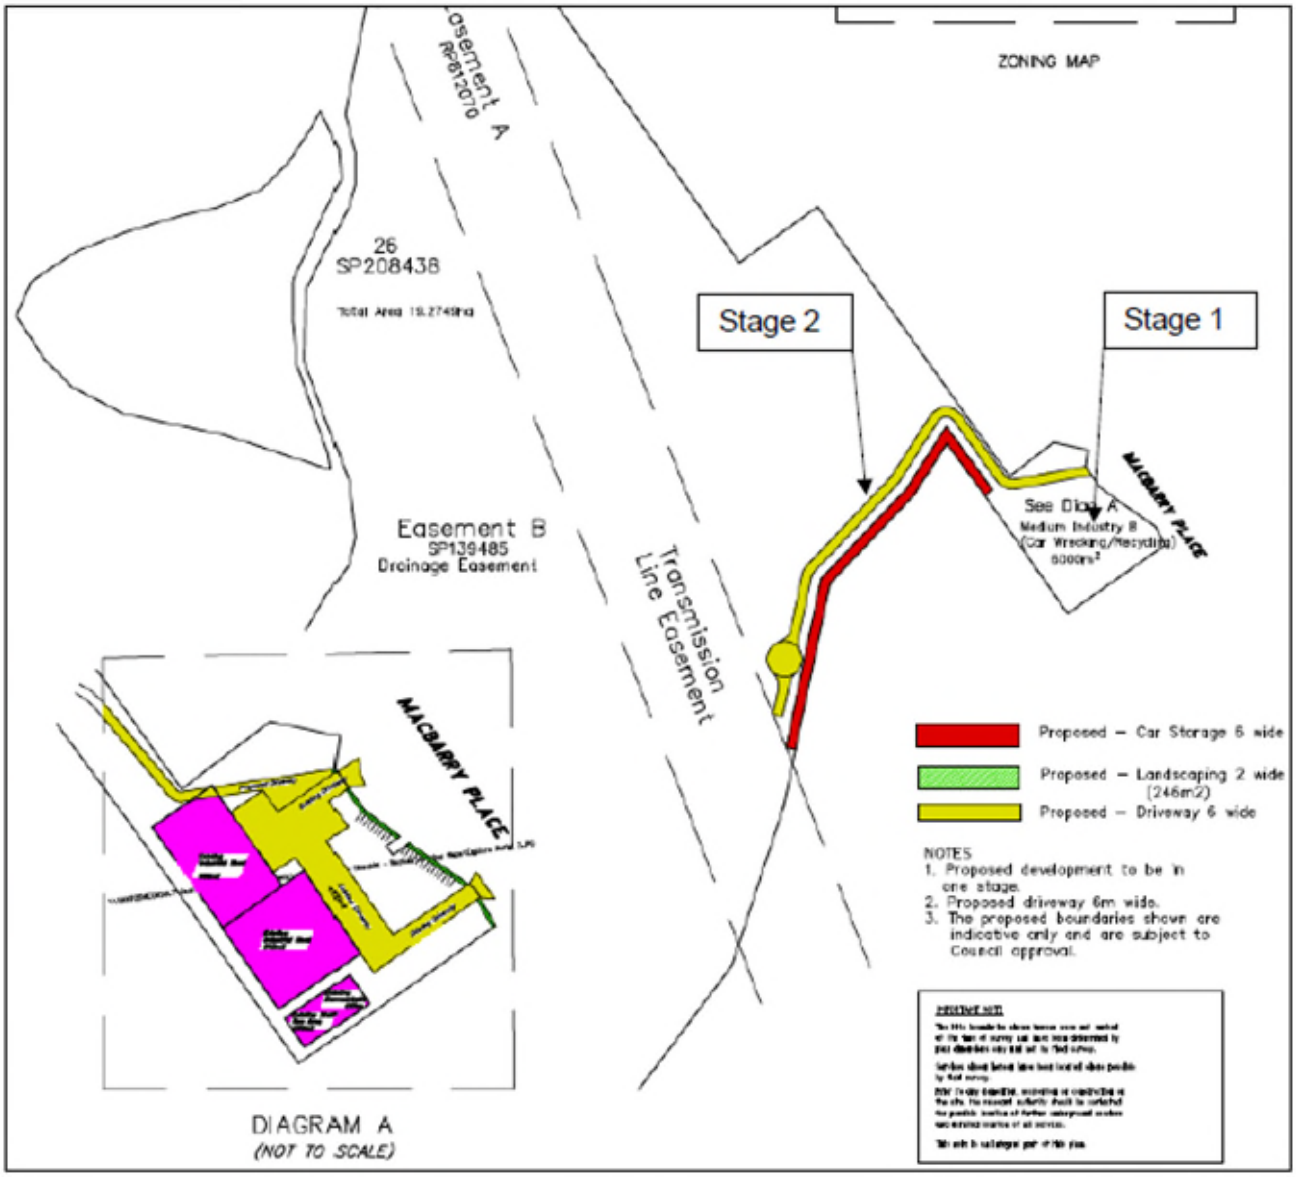

Sensitive place includes the following and includes a place within the curtilage of such a place reasonably used by persons at that place:

1. a dwelling, residential allotment, mobile home or caravan park, residential marina or other residential premises; or
2. a motel, hotel or hostel; or
3. a kindergarten, school, university or other educational institution; or
4. a medical centre or hospital; or
5. a protected area under the *Nature Conservation Act 1992*, the *Marine Parks Act 2004* or a World Heritage Area; or
6. a public park or garden; or
7. for noise, a sensitive receptor listed in Schedule 1 of the Environmental Protection (Noise) Policy 2019.

Waters includes river, stream, lake, lagoon, pond, swamp, wetland, unconfined surface water, unconfined water, natural or artificial watercourse, bed and bank of any waters, dams, non-tidal or tidal waters (including the sea), stormwater channel, stormwater drain, roadside gutter, stormwater run-off, and groundwater and any part thereof.
