Environment and Heritage Protection

21-JUN-2016

To: Mr Michael Purcell
Lot 2
168 Purono Parkway
YABULU QLD 4818

Email: diamondeng@fastmail.com.au

Attention: Mr Michael Purcell

Our reference: 223566

Application details

I refer to the application that was received by the administering authority on 20-JUN-2016.

Land description: Lot 24 Purono Parkway Yabulu Lot 24 Plan RP812229.

Decision

Your application has been approved and your environmental authority (reference EPPR00216613) is attached.

Should you have any further enquiries, please contact Veronica Lightfoot on telephone 1300 130 372.

Yours sincerely

Enclosed

Permit - environmental authority (reference EPPR00216613)

Permit[1]

Environmental Protection Act 1994

Environmental authority

This environmental authority is issued by the administering authority under Chapter 5 of the Environmental Protection Act 1994.

Permit[1] number: EPPR00216613

Environmental authority takes effect on 21-JUN-2016.

The anniversary date of this environmental authority remains 4-SEP. An annual return and the payment of the annual fee will be due each year on this day.

Environmental authority holder(s)

Name	Registered address
Mr Michael Purcell	Lot 2 168 Purono Parkway YABULU QLD 4818

Environmentally relevant activity and location details

Environmentally relevant activity(ies)	Location(s)
1-(2a) Aquaculture >100m2 but <10ha land	Lot 24 Purono Parkway Yabulu - Lot 24 Plan RP812229

Additional information for applicants

Environmentally relevant activities

The description of any environmentally relevant activity (ERA) for which an environmental authority is issued is a restatement of the ERA as defined by legislation at the time the approval is issued. Where there is any inconsistency between that description of an ERA and the conditions stated by an environmental authority as to the scale, intensity or manner of carrying out an ERA, then the conditions prevail to the extent of the inconsistency.

An environmental authority authorises the carrying out of an ERA and does not authorise any environmental harm unless a condition stated by the authority specifically authorises environmental harm.

A person carrying out an ERA must also be a registered suitable operator under the *Environmental Protection Act 1994* (EP Act).

Contaminated land

[1] Permit includes licences, approvals, permits, authorisations, certificates, sanctions or equivalent/similar as required by legislation

It is a requirement of the EP Act that if an owner or occupier of land becomes aware a notifiable activity (as defined in Schedule 3 and Schedule 4) is being carried out on the land, or that the land has been, or is being, contaminated by a hazardous contaminant, the owner or occupier must, within 22 business days after becoming so aware, give written notice to the chief executive.

Obligations under the *Environmental Protection Act 1994*

In addition to the requirements found in the conditions of this environmental authority, the holder must also meet their obligations under the EP Act, and the regulations made under the EP Act. For example, the holder must comply with the following provisions of the Act:

- general environmental duty (section 319)
- duty to notify environmental harm (section 320-320G)
- offence of causing serious or material environmental harm (sections 437-439)
- offence of causing environmental nuisance (section 440)
- offence of depositing prescribed water contaminants in waters and related matters (section 440ZG)
- offence to place contaminant where environmental harm or nuisance may be caused (section 443)

Conditions of environmental authority

The environmentally relevant activity(ies) conducted at the location as described above must be conducted in accordance with the following site specific conditions of approval.

4 Condition(s)

The following concurrence agency condition(s) are to be attached to any Development Approval:

Schedule A - General
Schedule B - Air
Schedule C - Water
Schedule D - Stormwater Management
Schedule E - Land
Schedule F - Noise
Schedule G - Waste
Schedule H - Self Monitoring and Reporting
Schedule I - Definitions
Schedule J - Site Location

SCHEDULE A - GENERAL

(A1) This Development Approval applies only to the construction, operation and maintenance of:

(i) aquaculture production ponds having a combined total area of not greater than 1.10 hectares for the production of Barramundi and Mangrove Jack;
(ii) 8 nursery tanks having a combined volume of not greater than 40 cubic meters; and
(iii) aquaculture waste water treatment ponds of an area not less than 1.8 hectares.

(A2) In carrying out the environmentally relevant activity the holder of this Development Approval must take all reasonable and practical measures to minimise releases and the likelihood of releases of contaminants to the environment, except as otherwise provided by the conditions of this Development Approval.

(A3) The holder of this Development Approval must:

(i) install all plant and equipment necessary to ensure compliance with the conditions; and
(ii) maintain such plant and equipment in a proper and efficient condition; and
(iii) operate such plant and equipment in a proper and efficient manner.

In this condition, "plant and equipment" includes where applicable:

(i) plant and equipment used to prevent and/or minimise the likelihood of environmental harm being caused;
(ii) devices and structures to contain foreseeable escapes of contaminants and waste, for example bunding and sumps;
(iii) devices and structures used to store, handle, and dispose of waste; and
(iv) monitoring equipment and associated alarms.

Access to Copy of Development Approval

(A4) A copy of this Development Approval and the relevant Environmental Authority NR337 must be kept on-site so as to be readily accessible to personnel carrying out the activity.

Records

(A5) Any record or document required to be kept by a condition of this Development Approval must be kept at the business address for a period of at least five years and be available for examination by an authorised person. For daily and weekly records, the record retention requirements of this condition will be satisfied if any daily and weekly records are kept for a period of at least three (3) years and these records are then kept in the form of annual summaries after that period.

(A6) Copies of any record required to be kept by a condition of this Development Approval must be provided to any authorised person of the Administering Authority on request.

Alterations

(A7) No change, replacement or operation of any plant or equipment is permitted if the change, replacement or operation of the plant or equipment increases, or is likely to substantially increase, the risk of environmental harm above that expressly provided by this Development Approval.

Note: An example of a substantial increase in the risk of environmental harm is an increase of 10% or more in the quantity of the contaminant to be released into the environment.

Monitoring and Measurements

(A8) All determinations of the quality of contaminants released to the environment and all measurements that are required by this Development Approval must be undertaken by a person or body possessing appropriate experience and qualifications to perform the required determinations and the required measurements.

(A9) All instruments and devices used for the measurement or monitoring of any parameter under any condition of this Development Approval must be calibrated, and appropriately operated and maintained.

Competency

(A10) The operation and maintenance of equipment used for undertaking the environmentally relevant activities to which this Development Approval relates must be carried out by or under the supervision of a person competent to operate and maintain such plant and equipment.

Chemicals

(A11) Chemicals must be used in accordance with manufactures requirements and are limited to those approved by the National Registration Authority, prescribed by a veterinarian or which have been declared "Exempt from Registration" and their use shall be in accordance with the label's requirements for aquaculture.

End of Development Conditions for Schedule A

SCHEDULE B – AIR

Dust/Odour

(B1) Notwithstanding any other conditions of this Development Approval no release of contaminants from the carrying out of the environmentally relevant activity is to cause an noxious or offensive odour at any sensitive place.

End of Development Conditions for Schedule B

SCHEDULE C – WATER

Release of Contaminants to Waters

(C1) Contaminants that may cause environmental harm must not be directly or indirectly released to any roadside gutter, stormwater drain, waters or the bed or banks of any waters, or to a sewer except as approved under another condition of this Development Approval or under a trade waste agreement as approved from time to time by the or Local Government.

(C2) Contaminants must not be directly or indirectly released from any source on the premises to any waters at any location other than water from the waste water retention and treatment system and the larval rearing ponds, at the location and quality as detailed in Schedule C Table 1 and depicted on the plan in Schedule J.

Schedule C Table 1

Location	Location Description	Quality Characteristics	Discharge Limits
Release Point - W1	End of an enclosed pipe into Healy Creek	-	
Monitoring Point - M1 Monitoring Point - M2	Point immediately before the enclosed pipe in the waste water treatment system which discharges into Healy Creek. Point immediately before the enclosed pipe in the larval rearing pond which discharges into Healy Creek.	Total Suspended Solids	- 25mg/L 80th %ile - 100mg/L max - 12kg/ha/day
		pH	- 6.5-8.5 range
		Dissolved Oxygen	- minimum concentration 75% saturation during daytime or within 10% of background values at any other time
		Total Nitrogen	- 0.8mg/L 80th %ile - 2mg/L maximum - 0.48kg/ha/day
		Total Phosphorous	- 0.07mg/L 80th %ile - 0.3mg/L maximum - 0.06kg/ha/day

(C3) All waste waters (except from the larval rearing ponds) must be directed through an on-farm waste water retention and treatment system designed to remove suspended solids and nutrients prior to discharge.

(C4) All waste waters must be discharged, from the release point W1, on an ebb tide (as varied for the discharge point), commencing 30 minutes after the start of the ebb tide and ceasing 45 minutes before the commencement of the flood tide.

(C5) All wastes must be directed from the discharge structure in a manner which does not erode or otherwise disturb marine vegetation, the stream banks, alter the creek systems hydrology or result in quantifiable negative impacts to the marine or terrestrial ecology.

(C6) Notwithstanding any other condition of this Development Approval, any release of contaminants to waters must not produce any slick or other visible evidence of oil or grease, nor contain visible floating oil, grease, scum, litter or other objectionable matter.

Quantity of Contaminants Released

(C7) The total quantity of contaminants released via W1 must not exceed the values specified in Schedule C Table 2.

Schedule C Table 2

Maximum Daily Discharge Rates	Maximum Volume (KL)
Daily Exchange	550
Daily Larval Rearing Pond Harvest (4 per year)	2640

(C8) The holder of this Development Approval must implement and continue to research recycling initiatives of the waste water into the production ponds.

Pond Construction

(C9) The bed and banks of the aquaculture and treatment ponds must have a permeability of not more than $1x10^{-9}$ metres/second.

End of Development Conditions for Schedule C

SCHEDULE D - STORMWATER MANAGEMENT

(D1) Drainage around the facility must be designed to minimise the contamination of stormwater including the prevention of erosion resulting in elevated suspended solids being transported off the site.

(D2) Contaminated stormwater that may cause environmental harm must not be directly or indirectly released from any source on the premises to which this Development Approval relates to any waters or the bed or banks of any waters at any location.

(D3) Any spillage of wastes, contaminants or other materials must be cleaned up as quickly as practicable. Such spillages must not be cleaned up by hosing, sweeping or otherwise releasing such wastes, contaminants or material to any stormwater drainage system, roadside gutter or waters.

(D4) Pond sediment removed from the aquaculture or treatment ponds must be stored and/or disposed of in a manner which does not cause the release of contaminants into a waterway or stormwater drain.

Bunding

(D5) All petroleum product storage must be within a spillage control compound sufficient to contain at least 110% of the volume of a single storage tank and, if more than one tank is contained within the bunded area, 100% of the largest storage tank plus 10% of the second largest tank within the bund.

(D6) All liquid chemical and petroleum drum storage, used to contain raw materials, processed materials and/or wastes, including storage's of oils, paints, solvents and resins, must be

bunded so as to effectively contain a volume equivalent to at least 25% of the maximum design storage volume within the bund.

(D7) All bunding must be constructed and maintained so as to be impervious to the material stored to allow retention and recovery of any materials being contained within the bund.

(D8) Where vehicle access to a bunded area is required, the access must be by way of a rollover bund.

(D9) A collection sump must be provided in the floor of the bund to facilitate the removal of liquids.

(D10) Any new bunds must have a floor that is graded so that the fall is towards the collection sump.

(D11) Any release of contaminants from spillage control compounds to waters must not produce any slick or other visible evidence of oil or grease, nor contain any visible floating oil, grease, scum, litter or other objectionable matter.

End of Conditions for Schedule D

SCHEDULE E - LAND

(E1) There must be no release nor the likelihood of release of any contaminants to land that may cause environmental harm or contribute to contamination of the land.

Release of Contaminants to Land

(E2) The only contaminants permitted to be released to land, for the purpose of plantation irrigation, are freshwater aquaculture wastes from the four (4) freshwater nursery tanks.

(E3) The defined contaminant release area is described as Lot 24 on plan RP812220, Purono Parkway, Yabulu.

(E4) No contaminants from the freshwater nursery tanks ponds must be directly or indirectly released to land beyond the boundaries of the premises to which this Development Approval relates.

Quantity of Contaminants Released to Land

(E5) The quantity of contaminants, as detailed in condition E2, released to land during any day must not exceed 20 cubic metres.

(E6) The land application of effluent by irrigation on the defined contaminate release area must be carried out in such a manner that:

(a) no runoff occurs outside the contaminant release area;
(b) surface ponding of effluent does not occur;
(c) the infiltration beyond the plant root zone is minimised;
(d) a minimum of 0.4 hectares must be provide for contaminant release; and
(e) irrigation should be applied uniformly onto the contaminate release area.

Acid Sulfate Soils

(E7) In the event of acid sulfate soils or potential acid sulfate soils being encountered whilst undertaking the environmentally relevant activities an Acid Sulfate Soil Investigation must be undertaken and a Acid Sulfate Soil Management Plan developed and implemented as soon as practicable.

(E8) The Acid Sulfate Soil investigation and Acid Sulfate Soil Management Plan, as required in E7, must be conducted and prepared in accordance with the "*Guidelines for Sampling and Analysis of Lowland Acid Sulphate Soils (ASS) in Queensland, 1998*" Version 4.0 August 1998, C.Ahern, M. Ahern and B Powell, Queensland Acid Sulfate Soil Information Team, Department of Natural Resources, or more recent additions or supplements to that document as such becomes available.

(E9) The Acid Sulfate Soil investigation and Acid Sulfate Soil Management Plan, as required in E7, must be supplied to the Administering Authority for comment and due regard must be given to those comments in the finalisation of the plan or program.

End of Conditions for Schedule E

SCHEDULE F - NOISE

Nil conditions.

End of Conditions for Schedule F

SCHEDULE G - WASTE MANAGEMENT

General

(G1) All packaging, processing, biological and general waste produced at the premises to which this Development Approval relates must be disposed of at a facility that can lawfully accept such wastes.

(G2) The holder of this Development Approval must not:

(a) burn waste at or on the premises to which this Development Approval relates; nor

(b) allow waste to burn or be burnt at or on the premises to which this Development Approval relates; nor
(c) remove waste from the premises to which this Development Approval relates and burn such waste elsewhere.

(G3) Washing, degreasing, servicing or other maintenance of vehicles, plant or other equipment must not occur at the premises to which this Development Approval relates in any area where resulting contaminants will or may be released to any stormwater drain, land or waters.

Waste Storage and Handling Conditions

(G4) Waste kept at the premises to which this Development Approval relates must only be stored in designated waste storage containers to ensure that there is no release to the environment.

Records

(G5) The holder of this Development Approval must keep and maintain records for all waste disposed on the premises, including aquaculture pond sludge other than that sludge which is used in the maintenance of ponds. The records must include the following information:

(a) description of the material;
(b) quantity of the material;
(c) date of disposal of the material;
(d) disposal location; and
(e) disposal methods.

Regulated Waste Disposal

(G6) Where any regulated waste is removed from the premises to which this Development Approval relates it must be transported by an operator who can lawfully transport such wastes to a facility that can lawfully accept such wastes.

(G7) Where regulated waste is removed from the premises to which this Development Approval relates, the following must be monitored and recorded:

(a) the date, quantity and type of waste removed; and
(b) name of the waste transporter and/or disposal operator that removed the waste; and
(c) the intended treatment/disposal destination of the waste.

Notification of Improper Disposal of Regulated Waste

(G8) If regulated waste has been removed from the premises to which this Development Approval relates and disposed of in a manner which is not authorised by this Development Approval or is improper or unlawful, then the Administering Authority must be notified, as soon as practicable, of all relevant facts, matters and circumstances known concerning the disposal.

Disease Management

(G9) The holder of this Development Approval must notify the Administering Authority of any disease outbreak requiring treatment and/or drainage of pond and/or tank contents.

(G10) The holder of this Development Approval must seek the written approval of the Administering Authority prior to disposing of any diseased organisms, or water which has come into contact with diseased organisms.

End of Conditions for Schedule G

SCHEDULE H - SELF MONITORING AND REPORTING

Complaint Recording

(H1) All complaints received by the holder of this Development Approval relating to the release of contaminants from premises to which this Development Approval relates must be recorded in a logbook with the following details:

(a) time and date of complaint;
(b) type of communication (telephone, letter, personal etc.);
(c) name, contact address and contact telephone number of complainant (Note: if the complainant does not wish to be identified then "Not identified" is to be recorded);
(d) response and investigation undertaken as a result of the complaint;
(e) name of person responsible for investigating complaint; and
(f) action taken as a result of the complaint investigation and signature of responsible person.

(H2) The holder of this Development Approval, upon receipt of an environmental nuisance complaint, and within a reasonable period of time, must;

(a) take all necessary actions to resolve the complaint including the use of appropriate dispute resolution if required; and
(b) implement abatement measures until emissions from the activity do not result in an environmental nuisance.

(H3) The complaints record required by condition number H1 must be maintained for a period of not less than 5 years.

Notification of Emergencies and Incidents

(H4) As soon as practicable after becoming aware of any emergency or incident which results in the release of contaminants not in accordance, or reasonably expected to be not in accordance with the conditions of this Development Approval, the holder of this Development Approval must notify the Administering Authority of the release by telephone or facsimile.

(H5) The notification of emergencies or incidents as required by condition number H4 must include but not be limited to the following:

(a) the holder of the Development Approval;
(b) the location of the emergency or incident;
(c) the number of the Development Approval;
(d) the name and telephone number of the designated contact person;
(e) the time of the release;
(f) the time the holder of the Development Approval became aware of the release;
(g) the suspected cause of the release;
(h) the environmental harm and or environmental nuisance caused, threatened, or suspected to be caused by the release, and
(i) actions taken to prevent further any release and mitigate any environmental harm and or environmental nuisance caused by the release.

(H6) Not more than 14 days following the initial notification of an emergency or incident, the holder of this Development Approval must provide written advice to the Administering Authority of the information supplied in accordance with condition number H5 in addition to:

(a) proposed actions to prevent a recurrence of the emergency or incident;
(b) outcomes of actions taken at the time to prevent or minimise environmental harm and or environmental nuisance, and
(c) the results of any environmental monitoring performed.

Monitoring of Contaminant Releases to Waters

(H7) The holder of this Development Approval is responsible for the making of determinations and keeping of records of the quality of the contaminants released from the release point, quality characteristics, and at the frequency specified in Schedule H Table 1.

Schedule H Table 1

Quality Characteristics	Frequency
Suspended Solids (mg/L)	on each day that a discharge occurs
pH	
Dissolved Oxygen	
Total Nitrogen (mg/L)	
Total Phosphorous (mg/L)	

(H8) All determinations of the quality of contaminants released to waters must be made in accordance with methods prescribed in the Environmental Protection Agency Water Quality Sampling Manual, 3rd Edition, December 1999, or more recent additions or supplements to that document as such become available.

(H9) Samples for determination of quality of contaminants released must be taken, at least, in duplication and the duplicate sample must be analysed if:

(a) the primary sample is destroyed or otherwise rendered unsuitable for analysis before an accurate analytical result is obtained; or
(b) the analysis of the primary sample is not considered to be accurate.

Monitoring of Volume of Release

(H10) The quantity of contaminants released must be determined by a method which is accurate to within 10% of the actual amount released.

(H11) Records must be kept of the results of all determinations of the quantity of contaminants released to waters. These records must include dates, times and volumes of the discharge.

Impact Monitoring

(H12) The holder of this Development Approval must keep a photographic record of Healy Creek at the release point (as specified in Schedule C - Table 1).

(H13) Photographs of the creek taken in accordance with condition H12 must be taken a minimum of once every six months and must clearly show the release point in the foreground and the creek in the background.

Report Submission - Annual Return

(H14) All photographs taken in accordance with condition H13 of this Development Approval must be submitted with the Annual Return covered by the period of the Annual Return.

(H15) The holder of this Development Approval must ensure that the results of all monitoring performed in accordance with this Development Approval for the period covered by the return are submitted with the annual return.

Exception Reporting

(H16) The holder of this Development Approval must notify the Administering Authority in writing within 28 days of completion of analysis of any result of a monitoring program required by a condition of this Development Approval which indicates an exceedance of any limit specified in this Development Approval.

(H17) The written notification required by condition number H16 must include:

(a) the full analysis results;
(b) details of investigation or corrective actions taken, and
(c) any subsequent analysis.

End of Conditions for Schedule H

SCHEDULE I - DEFINITIONS

For the purposes of this Development Approval the following definitions apply:

(I1) "Act" means the *Environmental Protection Act 1994*.

(I2) "Administering Authority" means the Environmental Protection Agency or its successor.

(I3) "holder of this Development Approval" means Wayne Robert Skinner

(I4) "premises to which this Development Approval relates" means Lot 24 Purono Parkway, Yabulu, Lot 24 on RP812229, Thuringowa City Council.

(I5) "noxious" means harmful or injurious to health or physical well being.

(I6) "offensive" means causing offence or displeasure; is disagreeable to the sense, disgusting, nauseous or repulsive.

(I7) "waters" means the bed and/or bank of any water(s), stormwater runoff and any part of a river, stream, lake, lagoon, pond, dam, swamp, wetland, unconfined surface water, underground water, unconfined water, natural or artificial watercourse, non tidal or tidal waters (including the sea), stormwater channel, stormwater drain and roadside gutter.

(I8) "Land" means land excluding waters and the atmosphere.

(I9) "Total Nitrogen" means the sum of Organic Nitrogen, Ammonia Nitrogen, Nitrite plus Nitrate Nitrogen

(I10) "mg/L" means milligrams per litre.

(I11) "80th percentile" means the measured values of the quality characteristics must not be greater than the release limit for any more than one out of five consecutive samples.

(I12) "maximum" means that the measured valued of the quality characteristic or contaminant must not be greater than the release limit stated.

(I13) "minimum" means that the measured valued of the quality characteristic or contaminant must not be less than the release limit stated.

(I14) "range" means that the measured valued of the quality characteristic or contaminant must not be higher than the higher release limit stated nor lower than the lower release limit stated.

(I15) "compound" means an area bounded by natural ground contours or by a bund, sufficiently impervious to retain spillage or leakage pending recovery.

(I16) "background" means a location to take water quality samples which represents the water quality of the area not affected by the discharge from the facility.

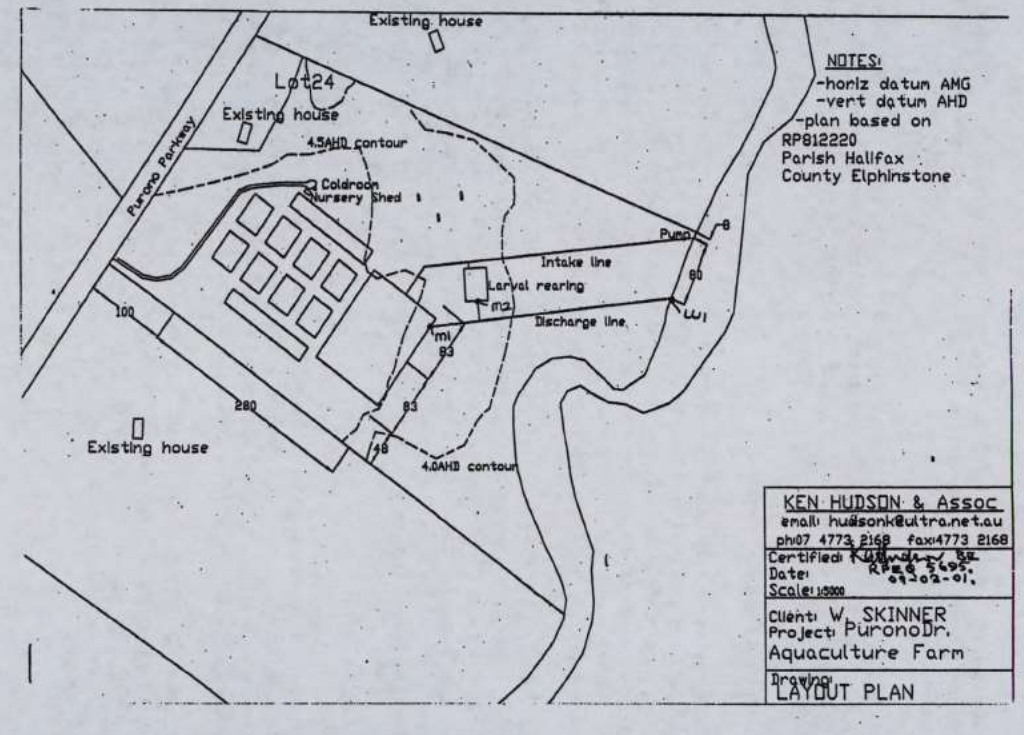

(I17) "regulated waste" means non-domestic waste mentioned in Schedule 7 of the *Environmental Protection Regulation 1998* (whether or not it has been treated or immobilised), and includes:

(a) for an element-any chemical compound containing the element; and
(b) anything that has contained the waste.

End of Conditions for Schedule I

End of Conditions for Schedule J

SCHEDULE J - SITE LOCATION

5 Reasons for including condition(s) or refusal

These conditions are imposed to minimise the likelihood of environmental harm being caused from contaminants that will or may be released into the environment when the activity to which the development relates is carried out.

The Queensland Environmental Protection Agency concurrence agency conditions for this proposed development, which are contained within this response, are required in accordance with section 46 of the *Environmental Protection Act 1994* and are relevant to the object and policies pertaining to this Act.

6 Additional comments or advice

All Aboriginal places in Queensland are protected under the terms of the *Cultural Record (Landscapes Queensland and Queensland Estate) Act 1987*, and penalty provisions may apply for any unauthorised interference with them. This applies whether or not such places are recorded in an official register and whether or not they are located in, on or under private land. Section 56(2) of the Act states that 'a person shall not take, destroy, damage, deface, excavate, expose, conceal or interfere with an item of the Queensland Estate' unless he does so under the authority of the Act.

An 'item of the Queensland Estate' is defined in Section 5 as any structure or object that is evidence of man's occupation of Queensland at any time that is at least 30 years in the past, but that is not made or constructed as a facsimile, made at or after the commencement of the Act for the purpose of sale, or that is not of prehistoric or historic significance. Therefore, any Aboriginal places which may occur on the subject property are protected under the terms of the Act even if the Queensland Environmental Protection Agency has no records relating to them.

7 Additional information

This concurrence response under the *Environmental Protection Act 1994* does not remove the need to obtain any further approval for this development, which might be required by other State and/or Commonwealth legislation. Applicants are advised to check with all relevant statutory authorities. Applicants also should comply with all relevant legislation.

Other Environmental Protection Agency approvals, licences and/or sanctions (for example, *Harbours Act 1955, Beach Protection Act 1968, Marine Parks Act 1982, Queensland Heritage Act 1992, Nature Conservation Act 1992*) that are required by this development or works are listed below. This response does not infer that the other necessary approvals, licences and/or sanctions will be granted.

8 Part 4A integrated authority for level 1 ERA(s) with development approvals

Under the *Environmental Protection Act 1994*, a Part 4A integrated authority from EPA will be required.
