

## Registration certificate

*Environmental Protection Act 1994*

# Certificate of Registration

**No: ENRE01044209**

This registration certificate is issued by the administering authority and takes effect from: 1 October 2009.

The anniversary day for the purposes of the Annual Return is: 1 October.

This registration certificate is a requirement of section 73F of the *Environmental Protection Act 1994* and authorises the registered operator to undertake the activity listed below at the following place; subject to the conditions set out in a development approval attached to the premises, or the relevant code of environmental compliance.

**Registered Operator:-**

Ridley Agriproducts Pty Ltd.  
T/a Ridley Aquafeed  
Level 4, 565 Bourke Street  
MELBOURNE VIC 3000

**Development Approval Number:** 0250000236

**Place:-**

Lot 10 Plan SL12506

**Located at:-**

12-18 Neon Street, NARANGBA QLD 4504

**Registered Activity/ies: -**

ERA 27 Seafood processing - processing, in a year, 500t or more of seafood or seafood products

Dear Sir/Madam

Re: **Environmental Protection Act 1994**  
**Granting of an Environmental Authority**

We are pleased to inform you that your application for an Environmental Authority under the Environmental Protection Act 1994 has been granted with conditions.

Please find enclosed the following materials:-

- \* Environmental Authority - This is your "Licence" which is a legal document and must be produced on demand to an authorised person, the licence identifies the licensee, the activity being licenced and the conditions of approval.
- \* Operator's Compliance Guide (Draft) - This guide contains practical measures to assist you in achieving compliance with the Environmental Protection Act 1994.

Should any work be required to be completed on the site, approval through Council's Health Department and any other relevant Council Department is required prior to commencement of this work.

Your annual licence fee will become due on 1 July, 1996.

Should your operations not be able to comply with all site conditions of your licence by 1 July, 1996, you will be required to submit an Environmental Management Program (EMP) at this time with the Annual Return.

Your attention is directed to these additional responsibilities under the Environmental Protection Act.

a) **Review of Decisions**

Provisions are provided for the review of decisions made under the Environmental Protection Act 1994 pursuant to Sections 45, 202 and 204.

Should you desire a review of this Environmental Authority (Licence) you must do so within **fourteen (14) days** of this letter. A request to review this Environmental Authority must be made in writing and be supported by sufficient information to enable a review to be made.

COPY ONLY

**CABOOLTURE SHIRE COUNCIL**

13 June 1996

**b) Alteration to the Work Practice or Procedure**

Before any alteration to the work practice or procedure is to occur which could result in a 10 percent increase in the quantity or quality of contaminants to be released into the environment, an application for licence amendment pursuant to Section 49 of the Environmental Protection Act 1994 shall be lodged with the Caboolture Shire Council.

**c) Ceasing the Environmentally Relevant Activity**

Within fourteen (14) days ceasing the environmentally relevant activity to which this licence relates, written notice of the ceasing of the activity shall be given to the Caboolture Shire Council pursuant to Section 54 of the Environmental Protection Act 1994.

**d) Sale of the Environmentally Relevant Activity**

If the environmentally relevant activity is to be sold, written notice shall be given to the buyer to make application for the transfer of this licence prior to the business being sold pursuant to Section 53 of the Environmental Protection Act.

**e) Annual Return**

The Caboolture Shire Council will contact prior to 31 August, 1996 in relation to an annual return licence which is simply the renewal of your licence.

The Annual return in the approved form shall be provided to the Caboolture Shire Council pursuant to Section 68 of the Environmental Protection Act.

**f) Duty to Notify of Environmental Harm**

Any person carrying out the activity or associated activity who becomes aware that environmental harm is being caused or threatened must notify their employer and the Caboolture Shire Council pursuant to Section 37 of the Environmental Protection Act 1994.

The Caboolture Shire Council is committed to working co-operatively with industry and the community for a cleaner, healthier, happier and sustainable environment. Your co-operation and assistance is greatly appreciated.

Should further information be required concerning this matter, please contact Council's Health Department as above referenced.

Yours faithfully,

**R W KRAUSE**

Chief Executive Officer

Per: 

**B T MADILL**

CHIEF ENVIRONMENTAL HEALTH OFFICER

Delegate of Administering Authority

Environmental Protection Act

# CABOOLTURE SHIRE COUNCIL

Environmental Authority Licence No: 0250000236  
Licensee: Ridley Agriproducts Pty Ltd  
Environmentally Relevant Activity: Pet, Stock or Aquaculture Food Manufacture

## SCHEDULE A LICENCE CONDITIONS

### 1.0 CONDITIONS OF RELEASE

- 1.1 Contaminants must not be released to the environment where the release will or may cause environmental harm unless such release is authorised by this authority.

### 2.0 NOISE

- 2.1 Noise emissions from the premises shall not cause environmental harm and shall not exceed the maximum noise levels prescribed by the Environmental Protection (Interim) Regulations 1995, Noise Environmental Protection Policy or an Environmental Protection Order issued by the Administering Authority.

### 3.0 AIR

- 3.1 The Environmentally Relevant Activity shall comply with the requirements of the Environmental Protection Act 1994, the Air Environmental Protection Policy or an Environmental Protection Order issued by the Administering Authority.
- 3.2 Odour and visible contaminants, including but not limited to dust, smoke, fumes and aerosols must not be released to the environment in a manner that will or may cause environmental harm unless such release is authorised by this Authority.
- 3.3 Mechanical Ventilation, conforming with the Environmental Protection Policy for Air, is to be installed in cooking areas/rooms and in odour production areas. Such equipment is to have building approval prior to installation.
- 3.4 Odour treatment (eg. condenser units, activated carbon filters, scrubbers, ozone treatment) is to be installed in the cooking and/or drying areas.
- 3.5 Dust extraction equipment shall be installed and maintained to contain dust emitted from the relevant operations.

#### Incineration

- 3.6 No incineration or open burning shall be carried out on site.

## CABOOLTURE SHIRE COUNCIL

Environmental Authority Licence No: 0250000236  
Licensee: Ridley Agriproducts Pty Ltd  
Environmentally Relevant Activity: Pet, Stock or Aquaculture Food Manufacture

---

### 4.0 WATER

- 4.1 The Environmentally Relevant Activity shall comply with the requirements of the Environmental Protection Act 1994, the Water Environmental Protection Policy or an Environmental Protection Order issued by the Administering Authority.
- 4.2 Only rainwater from uncontaminated areas shall drain into the stormwater drainage system.
- 4.3 The activity shall be conducted in a manner to prevent and/or minimise the contamination of surface stormwater runoff.
- 4.4 Wastewater shall not be released to stormwater, groundwater or discharged to creeks, rivers, lakes or water bodies of the state, however, town water that has not been contaminated in any form, may be permitted to enter the stormwater system.
- 4.5 The hosing or wet cleaning of workshop is prohibited unless practicable means or measures are installed to prevent environmental harm or nuisance.

### 5.0 WASTE

- 5.1 The Environmentally Relevant Activity shall comply with the requirements of the Environmental Protection Act 1994, the Waste Environmental Protection Policy or an Environmental Protection Order issued by the Administering Authority.
- 5.2 Waste shall not be released to the environment which will or may cause environmental harm unless such release is authorised by this Authority.
- 5.3 Contaminants (including but not limited to oil, waste oil, paint tins, solvents, adhesives etc) shall be stored on an impervious surface in a adequately bunded, covered and secured area, unless practicable means or measures are installed to prevent the possible contamination of stormwater.

#### Wastewater and Other Liquid Waste

- 5.4 Wastewater and other approved liquid waste shall be discharged to sewer under the conditions of a Trade Waste Permit issued for the site; or
- 5.5 If no sewer connection is available on site, wastewater is to be:-
- (i) treated to a standard suitable for acceptance to sewer and stored in an approved manner until removed for disposal at Council's Sewerage Treatment Plant by an approved waste transporter; or
  - (ii) approval may be given for on-site disposal of the waste water after an Environmental Impact Assessment has demonstrated no harm to the environment would result.

## **CABOOLTURE SHIRE COUNCIL**

**Environmental Authority Licence No: 0250000236**

**Licensee: Ridley Agriproducts Pty Ltd**

**Environmentally Relevant Activity: Pet, Stock or Aquaculture Food Manufacture**

---

5.6 *Liquid wastes not suitable for disposal to sewer shall be stored in an approved container and transported to an approved Hazardous Waste facility. The licensee must comply with the conditions of an approval to transport to an approved Hazardous Waste facility and the approval number to transport and dispose of liquid waste shall be provided to the administering authority.*

5.7 *Application for Trade Waste Permit to be made within three (3) months of the date this licence comes into effect and renewal of permit to be made each year.*

### **Solid Waste**

5.8 *All solid waste shall be removed to an approved waste disposal facility or approved waste recycling facility.*

5.9 *Where waste is taken off site, the holder of the environmental authority must monitor and record the:*

- a) *Date, quantity and type of wastes removed;*
- b) *Waste receiving operator that removed the wastes off-site; and*
- c) *Destination of the waste.*

5.10 *Where wastes are disposed of on site, (other than an approved discharge of liquids under this authority), the holder of the environmental authority must monitor and record:*

- a) *Date, quantity and type of wastes.*
- b) *Location and method of disposal.*

5.11 *All dusty and particulate wastes are required to be wrapped and bagged prior to disposal.*

5.12 *Transfer of collected dust to waste collection hoppers, bins and vehicles shall be conducted without causing a dust nuisance.*

### **6.0 LIGHT**

6.1 *Lighting used to illuminate any areas of the premises shall be angled or shaded in such a manner so that light does not directly illuminate or cause any environmental nuisance (eg glare) to any nearby premises or roadways.*

### **7.0 TRAINING**

7.1 *All persons engaged in the conduct of the activity shall be trained in the practices and procedures relating to the prevention of environmental harm during normal operations and emergencies within twelve (12) months of this environmental authority taking effect. Evidence of training shall be submitted as part of the annual return.*

## **CABOOLTURE SHIRE COUNCIL**

**Environmental Authority Licence No: 0250000236**

**Licensee: Ridley Agriproducts Pty Ltd**

**Environmentally Relevant Activity: Pet, Stock or Aquaculture Food Manufacture**

---

### **8.0 NOTICE OF OTHER DUTIES**

8.1 The holder of this environmental authority is advised that notwithstanding this environmental authority there may be obligations at law created by the Federal, State and Local Governments.

8.2 Any storage of flammable and combustible liquids in excess of Minor Storage must comply and be licensed in accordance with the "Building (Flammable and Combustible Liquids) Regulations 1994" and the associated Australian Standard AS 1940- 1993.

8.3 Where flammable liquid is stored in excess of 100 litres and not exceeding Minor Storage, it will be necessary to provide:

(a) One (1) 9Kg AB(E) fire extinguisher in accordance with AS1940-1993 (Section 10.7).

(b) A warning sign worded:  
"DANGER-FLAMMABLE LIQUID-NO SMOKING-KEEP AWAY"  
which shall be placed at an effective location adjacent to storage.

8.4 Any storage of flammable and combustible liquids in Minor Storage quantities must comply with all relevant provision of "PRECAUTIONS" under AS1940-1993.

### **9.0 DUTY TO NOTIFY ENVIRONMENTAL HARM**

9.1 While carrying out an activity a person becomes aware that serious or material environmental harm is caused or threatened by that activity or an associated activity, the person must notify their employer, or Caboolture Shire Council if the employer is not contactable; of the event, its nature and circumstances as soon as practicable after the event. Upon being notified, the employer's must notify Caboolture Shire Council of the event, its nature and circumstances as soon as practicable after the event.

### **10.0 PROCEDURES**

10.1 Practices and procedures, relating to the prevention of environmental harm or nuisance during normal operations and emergencies, must be documented and available at all times to persons engaged in the conduct of the activity within twelve (12) months of this environmental authority taking effect. This shall be submitted as part of the annual return.

### **11.0 ANNUAL RETURN**

11.1 The licence holder must provide the administering authority with an annual return in the approved form.

## **CABOOLTURE SHIRE COUNCIL**

*Environmental Authority Licence No: 0250000236*

*Licensee: Ridley Agriproducts Pty Ltd*

*Environmentally Relevant Activity: Pet, Stock or Aquaculture Food Manufacture*

---

### **12.0 SITE CONTAMINATION**

*12.1 The premises is to be operated so as to prevent land contamination.*

*12.2 Any known contamination of the site is to be remediated upon termination of the land use; and in the case of the transfer of the property, notification is to be sent to the administering authority and the purchasers at least fourteen (14) days prior to settlement.*

### **13.0 POLLUTION PREVENTION EQUIPMENT**

*13.1 All pollution prevention equipment must be maintained regularly in accordance with manufacturers specifications (where applicable).*

## Attachment A

**Biofilter odour thresholds**

1. The concentration of odour discharged from the biofilter is less than 500ou and the character of the process odour shall not be evident at all times.

**Site Based Management Plan**

2. The facility's site based management plan must be submitted to the Council for approval before the commencement of the plan and prior to any amendment of the plan.

3. The site based management plan must contain a target concentration for the main stack of 1,000ou, with a corresponding target rate of odour discharged from the main stack of 13,000ou.m<sup>3</sup>/s. *bulb to Subair?*

4. The site based management plan must specify a procedure to notify the Council of any exceedance of the discharge limits for the biofilter or discharge targets for the main stack. The notification must include the reason for the elevated level and what corrective action has been taken as a result of the elevated level.

**Biofilter Monitoring**

5. The concentration and character of odour in the air that is discharged from the biofilter shall be determined by sampling and analysing the discharged air from each of the two cells of the biofilter in accordance with AS4324.3:2001.

6. The sampling of the biofilter shall be conducted once every 3 months for the first year of operation and then once every 6 months thereafter.

7. The concentration and character of air that is discharged from each biofilter cell shall be determined from a composite sample collected from three locations at the surface of each cell.

**Main Stack Monitoring**

8. The concentration and rate of odour discharged from the main stack shall be determined by sampling and analysing the discharged air in accordance with:

- (a) Selection of sampling position: AS4323.1:1995;
- (b) Velocity and volumetric flow rate: USEPA Method 2 or 2C; and
- (c) Odour: AS4323.3:2001.

9. The sampling of the main stack shall be conducted once every 6 weeks for the first year of operation and then once every 3 months thereafter.
