Dear Sir/Madam

Re: Transfer of Environmental Authority (mining activities) No. EPSX00146113

Please note that new permit profiles have been implemented and as a result the reference number of the Environmental Authority has changed from MIC200719008 to EPSX00146113.

The department has assessed the application to transfer Environmental Authority (mining activities) No. EPSX00146113 from KS Mining Pty Ltd to Solar Silicon Resources Pty Ltd and advises that the application has been granted.

The relevant mining tenement approved for transfer is EPM17467. The financial assurance to the amount of \$2,500.00 will remain held as the financial assurance for Environmental Authority EPSX00146113. This Notice of Decision and the Environmental Authority constitute the permit documentation.

Please note that the transferee must, within 10 business days of receiving notification of the transfer, give each owner of the land to which the Environmental Authority relates written notice that the authority has been transferred to the transferee.

If the Environmental Authority holder becomes aware of any inconsistency between the amended Environmental Authority and the plan of operations, the plan must be amended within 28 days, in a way so that it is no longer inconsistent with the authority.

The conditions of the Environmental Authority are in force until a surrender of the Authority is approved pursuant to the Environmental Protection Act 1994. The conditions apply unless an amendment is approved pursuant to the Environmental Protection Act 1994.

If you require more information please contact Roslyn Howie on 1300 130 372.

Additional information for applicants

Environmentally relevant activities

The description of any environmentally relevant activity (ERA) for which an environmental authority is issued is a restatement of the ERA as defined by legislation at the time the approval is issued. Where there is any inconsistency between that description of an ERA and the conditions stated by an environmental authority as to the scale, intensity or manner of carrying out an ERA, then the conditions prevail to the extent of the inconsistency.

An environmental authority authorises the carrying out of an ERA and does not authorise any environmental harm unless a condition stated by the authority specifically authorises environmental harm.

A person carrying out an ERA must also be a registered suitable operator under the *Environmental Protection Act 1994* (EP Act).

Contaminated land

¹ Permit includes licences, approvals, permits, authorisations, certificates, sanctions or equivalent/similar as required by legislation

It is a requirement of the EP Act that if an owner or occupier of land becomes aware a notifiable activity (as defined in Schedule 3 and Schedule 4) is being carried out on the land, or that the land has been, or is being, contaminated by a hazardous contaminant, the owner or occupier must, within 22 business days after becoming so aware, give written notice to the chief executive.
