

Permit

Environmental Protection Act 1994

Environmental authority EPSX04179416

This environmental authority is issued by the administering authority under Chapter 5 of the Environmental Protection Act 1994.

Environmental authority number: EPSX04179416

Environmental authority takes effect on 27 July 2020.

The anniversary date of this environmental authority is the 27 September. The payment of the annual fee will be due each year on this day.

Environmental authority holder(s)

Name(s)	Registered address
BOWEN RIVER COAL PTY LTD	Level 15, 40 Creek Street BRISBANE CITY QLD 4000

Environmentally relevant activity and location details

Environmentally relevant activity/activities	Location(s)
Non-Scheduled - Mining Activity - Mineral Development Licence (MDL)	MDL3019

Additional information for applicants

Environmentally relevant activities

The description of any environmentally relevant activity (ERA) for which an environmental authority (EA) is issued is a restatement of the ERA as defined by legislation at the time the EA is issued. Where there is any inconsistency between that description of an ERA and the conditions stated by an EA as to the scale, intensity or manner of carrying out an ERA, the conditions prevail to the extent of the inconsistency.

An EA authorises the carrying out of an ERA and does not authorise any environmental harm unless a condition stated by the EA specifically authorises environmental harm.

A person carrying out an ERA must also be a registered suitable operator under the *Environmental Protection Act 1994* (EP Act).

Contaminated land

It is a requirement of the EP Act that an owner or occupier of contaminated land give written notice to the administering authority if they become aware of the following:

- the happening of an event involving a hazardous contaminant on the contaminated land (notice must be given within 24 hours); or
- a change in the condition of the contaminated land (notice must be given within 24 hours); or
- a notifiable activity (as defined in Schedule 3) having been carried out, or is being carried out, on the contaminated land (notice must be given within 20 business days)

that is causing, or is reasonably likely to cause, serious or material environmental harm.

For further information, including the form for giving written notice, refer to the Queensland Government website www.qld.gov.au, using the search term 'duty to notify'.

Take effect

Please note that, in accordance with section 200 of the EP Act, an EA has effect:

- a) if the authority is for a prescribed ERA and it states that it takes effect on the day nominated by the holder of the authority in a written notice given to the administering authority - on the nominated day; or
- b) if the authority states a day or an event for it to take effect-on the stated day or when the stated event happens; or
- c) otherwise on the day the authority is issued.

However, if the EA is authorising an activity that requires an additional authorisation (a relevant tenure for a resource activity, a development permit under the *Planning Act 2016* or an SDA Approval under the *State Development and Public Works Organisation Act 1971*), this EA will not take effect until the additional authorisation has taken effect.

If this EA takes effect when the additional authorisation takes effect, you must provide the administering authority written notice within 5 business days of receiving notification of the related additional authorisation taking effect.

If you have incorrectly claimed that an additional authorisation is not required, carrying out the ERA without the additional authorisation is not legal and could result in your prosecution for providing false or misleading information or operating without a valid environmental authority.

Department of Environment and Science
Delegate of the administering authority
Environmental Protection Act 1994

Privacy statement

Pursuant to section 540 of the EP Act, the Department is required to maintain a register of certain documents and information authorised under the EP Act. A copy of this document will be kept on the public register. The register is available for inspection by members of the public who are able take extracts, or copies of the documents from the register. Documents that are required to be kept on the register are published in their entirety, unless alteration is required by the EP Act. There is no general discretion allowing the Department to withhold documents or information required to be kept on the public register. For more information on the Department's public register, search 'public register' at www.qld.gov.au. For queries about privacy matters please email privacy@des.qld.gov.au or telephone 13 74 68.

Obligations under the *Environmental Protection Act 1994*

In addition to the requirements found in the conditions of this environmental authority, the holder must also meet their obligations under the EP Act, and the regulations made under the EP Act. For example, the holder must comply with the following provisions of the Act:

- general environmental duty (section 319)
- duty to notify environmental harm (section 320-320G)
- offence of causing serious or material environmental harm (sections 437-439)
- offence of causing environmental nuisance (section 440)

Conditions of environmental authority

With the exception of any variations, the conditions of approval for this environmental authority are the standard conditions contained within the attached documents:

- *Eligibility criteria and standard conditions for exploration and mineral development projects – Version 2 (ESR/2016/1985)*

All reasonable steps must be taken to ensure the activity complies with the eligibility criteria and standard conditions

Variations to the standard conditions include:

Schedule A – General conditions

Condition number	Condition
A1	This environmental authority does not authorise environmental harm unless a condition contained within the authority explicitly authorises that harm. Where there is no condition or the authority is silent on a matter, the lack of a condition or silence shall not be construed as authorising harm.
A2	For exploration activities the environmental authority holder must comply with each of the standard environmental conditions contained in the <i>Eligibility criteria and standard conditions for exploration and mineral development projects-Version 2 (ESR/2016/1985)</i> , except Condition A13, which is replaced by a new Condition C1, Table C1, Table C2 and a Figure at Attachment 1 in this environmental authority.
A3	If there is any inconsistency between a standard environmental condition and an additional condition in this environmental authority, the additional condition prevails to the extent of any inconsistency.

Schedule C – Authorised Disturbance

Condition number	Condition
C1	The holder of the environmental authority must not carry out activities in a category A or B Environmentally Sensitive Area (ESA). Activities involving machinery must not be carried out within 1km of a category A environmentally sensitive area or within 500m of category B environmentally sensitive area, with the exception of activities authorised in Table C1: Authorised disturbance within 500m of Category B environmentally sensitive area, located in accordance with the coordinates in Table C2: Drill Pad Locations and illustrated in Attachment A. Authorised Disturbance with Category B ESA buffer. Prior to carrying out activities in a Category C environmentally sensitive area, consult with the relevant administering authority and the Environmental Protection Agency. If it is determined through the consultation that additional conditions are necessary, the holder must comply with those conditions.

Table C1: Authorised disturbance within 500m buffer zone of Category B environmentally sensitive area:

Activity	Authorised disturbance within Category B ESA 500m Buffer zone	Maximum Footprint of Disturbance
Drill Pads	94 drill pads (20m X 30m)	5.64ha
Tracks	26,009m (2.5m wide)	6.50ha
Total Disturbance		12.14ha

Table C2: Authorised disturbance within 500m buffer zone of Category B environmentally sensitive area drill pad locations.
