

Permit

Environmental Protection Act 1994

Environmental authority EPVL01491413

This environmental authority is issued by the administering authority under Chapter 5 of the Environmental Protection Act 1994.

Environmental authority number: EPVL01491413

Environmental authority takes effect on 07 May 2014

Environmental authority holder(s)

Name(s)	Registered address
Timothy Francis Pyke	721 Calder Rd CALDER TAS 7325 Australia
Emma Pyke	721 Calder Rd CALDER TAS 7325 Australia

Environmentally relevant activity and location details

Environmentally relevant activity/activities	Location(s)
Non-Scheduled Mining Activity Mining Lease - ML	ML70509

Additional information for applicants

Environmentally relevant activities

The description of any environmentally relevant activity (ERA) for which an environmental authority (EA) is issued is a restatement of the ERA as defined by legislation at the time the EA is issued. Where there is any inconsistency between that description of an ERA and the conditions stated by an EA as to the scale, intensity or manner of carrying out an ERA, the conditions prevail to the extent of the inconsistency.

An EA authorises the carrying out of an ERA and does not authorise any environmental harm unless a condition stated by the EA specifically authorises environmental harm.

A person carrying out an ERA must also be a registered suitable operator under the *Environmental Protection Act 1994* (EP Act).

Contaminated land

It is a requirement of the EP Act that an owner or occupier of contaminated land give written notice to the administering authority if they become aware of the following:

- the happening of an event involving a hazardous contaminant on the contaminated land (notice must be given within 24 hours); or
- a change in the condition of the contaminated land (notice must be given within 24 hours); or
- a notifiable activity (as defined in Schedule 3) having been carried out, or is being carried out, on the contaminated land (notice must be given within 20 business days);

that is causing, or is reasonably likely to cause, serious or material environmental harm.

For further information, including the form for giving written notice, refer to the Queensland Government website www.qld.gov.au, using the search term 'duty to notify'.

Take effect

Please note that, in accordance with section 200 of the EP Act, an EA has effect:

- a) if the authority is for a prescribed ERA and it states that it takes effect on the day nominated by the holder of the authority in a written notice given to the administering authority-on the nominated day; or
- b) if the authority states a day or an event for it to take effect-on the stated day or when the stated event happens; or
- c) otherwise-on the day the authority is issued.

However, if the EA is authorising an activity that requires an additional authorisation (a relevant tenure for a resource activity, a development permit under the *Sustainable Planning Act 2009* or an SDA Approval under the *State Development and Public Works Organisation Act 1971*), this EA will not take effect until the additional authorisation has taken effect.

If this EA takes effect when the additional authorisation takes effect, you must provide the administering authority written notice within 5 business days of receiving notification of the related additional authorisation taking effect.

If you have incorrectly claimed that an additional authorisation is not required, carrying out the ERA without the additional authorisation is not legal and could result in your prosecution for providing false or misleading information or operating without a valid environmental authority.

Obligations under the *Environmental Protection Act 1994*

In addition to the requirements found in the conditions of this environmental authority, the holder must also meet their obligations under the EP Act, and the regulations made under the EP Act. For example, the holder must comply with the following provisions of the Act:

- general environmental duty (section 319)
- duty to notify environmental harm (section 320-320G)
- offence of causing serious or material environmental harm (sections 437-439)
- offence of causing environmental nuisance (section 440)
- offence of depositing prescribed water contaminants in waters and related matters (section 440ZG)
- offence to place contaminant where environmental harm or nuisance may be caused (section 443)

Conditions of environmental authority

With the exception of any variations, the conditions of approval for this environmental authority include standard conditions contained within the attached document entitled:

- Code of Environmental Compliance for Mining Lease Projects, Version 1

Variations to the standard conditions include:

Condition Number	Condition
Prevent or Minimise the Likelihood of Environmental Harm	
A1	This environmental authority does not authorise environmental harm unless a condition contained within the environmental authority explicitly authorises the harm. Where there is no condition or the environmental authority is silent on a matter, the lack of condition or silence shall not be construed as authorising harm.
A2	All reasonable and practicable measures must be taken to minimise the likelihood of environmental harm being caused.
Financial Assurance	
A3	The activity must not be carried out until the environmental authority holder has given financial assurance to the administering authority as security for compliance with this

Environmental authority

	environmental authority and any costs or expenses, or likely costs or expenses, mentioned in section 298 of the Act.
Land Disturbance	
F1	The environmental authority holder is authorised to undertake mining activities, within the 1km buffer of any Category B Environmentally Sensitive Areas.
F2	The environmental authority holder is not authorised to undertake any mining activities in any Category B Environmentally Sensitive Area.
Roads and Tracks	
F3	Existing access and fence line tracks must be used wherever possible. Any new tracks are to be constructed (with prior consultation of the landowner) by linking naturally cleared or disturbed areas.
F4	When constructing tracks, the environmental authority holder must minimise disturbance and avoid clearing of trees in or within the 1km buffer and in Category B Environmentally Sensitive Areas.
Rehabilitation	
F5	Rehabilitation must be carried out in accordance with the <i>Code of Environmental Compliance for Mining Lease Projects</i> .
F6	Rehabilitation of disturbance within the 1km buffer of Category B Environmentally Sensitive Areas must be completed as soon as practicable, but no longer than three (3) months after completion of the disturbance activity
F7	All land subject to mining activities must be rehabilitated within six (6) months of concluding mining activities to a non- polluting, safe, stable and self-sustaining landform as per the <i>Code of Environmental Compliance for Mining Lease Projects</i> .
Reporting	
F8	An annual report must be prepared each year and made available to the administering authority upon request. The report must include a map identifying all mining activities undertaken to date on each tenure under this environmental authority. The map is to clearly distinguish between proposed, completed and rehabilitated mining activities to demonstrate compliance with this environmental authority.
