# Permit

***Environmental Protection Act 1994***

## Environmental authority P-EA-100293296

*This environmental authority is issued by the administering authority under Chapter 5 of the* Environmental Protection Act 1994.

## Environmental authority number: P-EA-100293296

**Environmental authority takes effect on day the authority is issued.**

The anniversary date of this environmental authority is 9 February. The payment of the annual fee will be due each year on this day.

## Environmental authority holder(s)

| Name(s) | Registered address |
|---|---|
| GATTON RECYCLING PTY LTD | WMS Tax and Advisory<br>"The Rocket" Suite<br>Level 14/203 Robina Town Centre Drive<br>ROBINA QLD 4226 |

## Environmentally relevant activity and location details

| Environmentally relevant activity/activities | Location(s) |
|---|---|
| ERA 16 - Extraction and Screening - 2(b) - Extracting, other than by dredging, in a year, the following quantity of material - more than 100,000t but not more than 1,000,000t | 44/RP12464 |
| ERA 16 - Extraction and Screening - 3(b) - Screening, in a year, the following quantity of material - more than 100,000t but not more than 1,000,000t | 44/RP12464 |

**Additional information for applicants**

Environmentally relevant activities

The description of any environmentally relevant activity (ERA) for which an environmental authority (EA) is issued is a restatement of the ERA as defined by legislation at the time the EA is issued. Where there is any inconsistency between that description of an ERA and the conditions stated by an EA as to the scale, intensity or manner of carrying out an ERA, the conditions prevail to the extent of the inconsistency.

An EA authorises the carrying out of an ERA and does not authorise any environmental harm unless a condition stated by the EA specifically authorises environmental harm.

A person carrying out an ERA must also be a registered suitable operator under the *Environmental Protection Act 1994* (EP Act).

Mobile and temporary activities

If you operate a mobile and temporary environmentally relevant activity (ERA), other than regulated waste transport, you are required to maintain a work diary. You must:

- use the approved form for a work diary (ESR/2015/1696);
- keep the work diary records for 2 years after the last entry;
- inform the administering authority within 7 days of the work diary being lost or stolen;
- record the information required in the work diary for each location within 1 day of leaving the location.

Contaminated land

It is a requirement of the EP Act that an owner or occupier of contaminated land give written notice to the administering authority if they become aware of the following:

- the happening of an event involving a hazardous contaminant on the contaminated land (notice must be given within 24 hours); or
- a change in the condition of the contaminated land (notice must be given within 24 hours); or
- a notifiable activity (as defined in Schedule 3) having been carried out, or is being carried out, on the contaminated land (notice must be given within 20 business days)

that is causing, or is reasonably likely to cause, serious or material environmental harm.

For further information, including the form for giving written notice, refer to the Queensland Government website www.qld.gov.au, using the search term 'duty to notify'.

Take effect

Please note that, in accordance with section 200 of the EP Act, an EA has effect:

a) if the authority is for a prescribed ERA and it states that it takes effect on the day nominated by the holder of the authority in a written notice given to the administering authority - on the nominated day; or

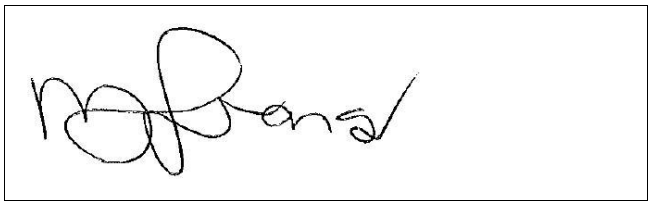

b) if the authority states a day or an event for it to take effect-on the stated day or when the stated event happens; or

c) otherwise - on the day the authority is issued.

However, if the EA is authorising an activity that requires an additional authorisation (a relevant tenure for a resource activity, a development permit under the *Planning Act 2016* or an SDA Approval under the *State Development and Public Works Organisation Act 1971*), this EA will not take effect until the additional authorisation has taken effect.

If this EA takes effect when the additional authorisation takes effect, you must provide the administering authority written notice within 5 business days of receiving notification of the related additional authorisation taking effect.

If you have incorrectly claimed that an additional authorisation is not required, carrying out the ERA without the additional authorisation is not legal and could result in your prosecution for providing false or misleading information or operating without a valid environmental authority.

Signature

**21 January 2026**

Date

Mark Franco
**Department of the Environment, Tourism, Science and Innovation**
Delegate of the administering authority
*Environmental Protection Act 1994*

**Enquiries:**
Permits and Licence Management
GPO Box 2454, BRISBANE QLD 4001
Phone: 1300 130 372
Email: palm@detsi.qld.gov.au

**Obligations under the *Environmental Protection Act 1994***

In addition to the requirements found in the conditions of this environmental authority, the holder must also meet their obligations under the EP Act, and the regulations made under the EP Act. For example, the holder must comply with the following provisions of the Act:

- general environmental duty (section 319)
- duty to notify environmental harm (section 320-320G)
- offence of causing serious or material environmental harm (sections 437-439)
- offence of causing environmental nuisance (section 440)
- offence of depositing prescribed water contaminants in waters and related matters (section 440ZG)
- offence to place contaminant where environmental harm or nuisance may be caused (section 443)

**Other permits required**

This permit only provides an approval under the *Environmental Protection Act 1994*. In order to lawfully operate you may also require permits / approvals from your local government authority, other business units within the department and other State Government agencies prior to commencing any activity at the site. For example, this may include permits / approvals with your local Council (for planning approval), the Department of Transport and Main Roads (to access State controlled roads), the Department of Natural Resources and Mines, Manufacturing and Regional and Rural Development (to clear vegetation), and the Department of Primary Industries (to clear marine plants or to obtain a quarry material allocation).

**Obligations under the *Mining and Quarrying Safety and Health Act 1999***

If you are operating a quarry, other than a sand and gravel quarry where there is no crushing capability, you will be required to comply with the *Mining and Quarrying Safety and Health Act 1999*. For more information on your obligations under this legislation contact Mine Safety and Health at www.nrmmrrd.qld.gov.au, or phone 13 QGOV (13 74 68) or your local Mines Inspectorate Office.

**Development Approval**

This permit is not a development approval under the *Planning Act 2016*. The conditions of this environmental authority are separate, and in addition to, any conditions that may be on the development approval. If a copy of this environmental authority is attached to a development approval, it is for information only, and may not be current. Please contact the Department of the Environment, Tourism, Science and Innovation to ensure that you have the most current version of the environmental authority relating to this site.

**Conditions of environmental authority**

| **Agency interest: General** | |
|---|---|
| **Condition number** | **Condition** |
| G1 | Activities under this environmental authority must be conducted in accordance with the following limitations:<br>1. Extraction must only occur within Pit 1, Pit 2, Pit 3, Pit 4 and Pit 5 in *Figure 1 "Plan of Quarry"* and *Table 1 – Extraction Area Coordinates* in Appendix 1;<br>2. The amount of material extracted must not exceed 500,000 tonnes per annum;<br>3. The amount of material screened must not exceed 1,000,000 tonnes per annum;<br>4. The activity and clearing of vegetation must not occur within 200 metres from the upper terrace of Buaraba Creek as shown in *Figure 1 "Plan of Quarry"*; and<br>5. The depth of extraction must not intercept groundwater. |
| G2 | All reasonable and practicable measures must be taken to prevent or minimise environmental harm caused by the activities. |
| G3 | Any breach of a condition of this environmental authority must be reported to the administering authority as soon as practicable within 24 hours of becoming aware of the breach. Records must be kept including full details of the breach and any subsequent actions taken. |
| G4 | Other than as permitted by this environmental authority, the release of a contaminant into the environment must not occur. |
| G5 | Extraction area boundaries, as identified in *Figure 1 "Plan of Quarry" and Table 1 – Extraction Area Coordinates* in Appendix 1, must be clearly marked on site. |
| G6 | Environmental monitoring results must be kept until surrender of this environmental authority. All other information and records that are required by the conditions of this environmental authority must be kept for a minimum of five (5) years. All information and records required by the conditions of this environmental authority must be provided to the administering authority**, or** nominated delegate upon request**,** within the required timeframe and in the specified format. |
| G7 | An appropriately qualified person(s) must monitor, record and interpret all parameters that are required to be monitored by this environmental authority and in the manner specified by this environmental authority. |
| G8 | All analyses required under this environmental authority must be carried out by a laboratory that has National Association of Testing Authorities (NATA) certification, or an equivalent certification, for such analyses. The only exception to this condition is the in situ monitoring of turbidity, pH, electrical conductivity and dissolved oxygen. |
| G9 | When required by the administering authority, monitoring must be undertaken in the manner prescribed by the administering authority, to investigate a complaint of environmental nuisance arising from the activity. The monitoring results must be provided within 10 business days to the administering authority upon its request. |

| | |
|---|---|
| G10 | The activity must be undertaken in accordance with written procedures that:<br>1. identify potential risks to the environment from the activity during routine operations, closure and an emergency<br>2. establish and maintain control measures that minimise the potential for environmental harm<br>3. ensure plant, equipment and measures are maintained in a proper and effective condition<br>4. ensure plant, equipment and measures are operated in a proper and effective manner<br>5. ensure that staff are trained and aware of their obligations under the *Environmental Protection Act 1994*<br>6. ensure that reviews of environmental performance are undertaken at least annually. |
| G11 | Chemicals and fuels in containers of greater than 15 litres must be stored within a secondary containment system. |
| **Agency interest: Waste** | |
| **Condition number** | **Condition** |
| W1 | All waste generated in carrying out the activity must be reused, recycled or removed to a facility that can lawfully accept the waste. |
| **Agency interest: Air** | |
| **Condition number** | **Condition** |
| A1 | Other than as permitted within this environmental authority, odours or airborne contaminants must not cause environmental nuisance to any sensitive place **or** commercial place. |
| A2 | Dust and particulate matter emissions must not exceed the following concentrations at any sensitive place or commercial place:<br>a) dust deposition of 120 milligrams per square metre per day, when monitored in accordance with Australian Standard AS 3580.10.1 (or more recent editions), or<br>b) a concentration of particulate matter with an aerodynamic diameter of less than 10 micrometre (µm) (PM10) suspended in the atmosphere of 50 micrograms per cubic metre over a 24 hour averaging time, when monitored in accordance with Australian Standard AS 3580.9.6 (or more recent editions) or any other method approved by the administering authority. |
| **Agency interest: Land** | |
| **Condition number** | **Condition** |

| | |
|---|---|
| L1 | Contaminants must not be released to land. |
| L2 | Land that has been disturbed for activities conducted under this environmental authority must be rehabilitated in a manner such that:<br>1. suitable native species of vegetation, including koala suitable species, for the location are established and sustained for earthen surfaces;<br>2. potential for erosion is minimised;<br>3. the quality of water released from the site, including seepage, does not cause environmental harm;<br>4. potential for environmental nuisance caused by dust is minimised;<br>5. the water quality of any residual water body does not have potential to cause environmental harm;<br>6. the final landform is stable and protects public safety. |
| L3 | Rehabilitation of disturbed areas required under condition L2 must take place progressively as works are staged and new extraction areas are commenced. |
| L4 | The combined extraction area disturbance must not exceed 20 hectares at any one time. |
| L5 | For condition L4, an area is not considered to be disturbed if it meets the following criteria:<br>1. The areas designated for rehabilitation are:<br>a. non-polluting; and<br>b. a stable landform; and<br>c. re-profiled to contours consistent with the surrounding landform; and<br>2. Surface drainage lines are re-established; and<br>3. Topsoil is re-instated; and<br>4. At least 80% of the vegetation required for the rehabilitation is planted; and<br>5. An appropriately qualified person has certified that the area complies with condition L2. |
| L6 | Conditions L2 and L5 continue to apply after this environmental authority has ended or ceased to have effect. |

L7

**Prescribed environmental matters - Matters of State Environmental Significance**

Impacts to Matters of State Environmental Significance (MSES) as a result of carrying out the activity must only occur within the locations and to the maximum extents stated in *Table – Authorised impacts to MSES*.

**Table – Authorised impacts to MSES**

| Matters of State environmental significance | Location of impact | Significant residual impact | Offset Required | Maximum extent of impact of total area on site |
|---|---|---|---|---|
| **REGULATED VEGETATION** | | | | |
| Of concern regional ecosystem – 12.9-10.2/12.9-10.7a | As shown in Appendix 2 Figure 2 and Appendix 2 Table 2 | Yes | Yes | 2.24 ha of 18.48 total site ha |
| **PROTECTED WILDLIFE HABITAT** | | | | |
| A koala habitat area (Essential Habitat/ SEQ Koala Habitat – Core) | As shown in Appendix 2 Figure 2 and Appendix 2 Table 2 | Yes | Yes | 0.62 ha of 13.41 total site ha |
| Habitat for an animal that is critically endangered wildlife, endangered wildlife or vulnerable wildlife or a special least concern animal – Koala | As shown in Appendix 2 Figure 2 and Appendix 2 Table 2 | Yes | Yes | 1.8 ha of 5.07 total site ha |

L8

**Environmental Land Based Offsets**

A land based environmental offset must be made in accordance with the *Environmental Offsets Act 2014* and Queensland Environmental Offsets Policy, EPP/2015/1658 Version 1.13, for the maximum extent of impact to each prescribed environmental matter as requiring an offset as listed in *Table – Authorised impacts to MSES*.

***Note:*** *Deemed conditions provided in section 16 of the Environmental Offsets Act 2014 also apply to this authority. Any contravention of a deemed condition will be dealt with under the Environmental Protection Act 1994.*

L9

The notice of election for the environmental offset required by condition L8 must be by submitted to the administering authority in accordance with the *Environmental Offsets Act 2014* by 30 June 2023.

**Agency interest: Acoustic**

| Condition number | Condition |
|---|---|
| N1 | Other than as permitted within this environmental authority, noise generated by the activity must not cause environmental nuisance to any sensitive place or commercial place. |

<table>
<tr><td>N2</td><td>Noise from the activity must not exceed the levels identified in Table - Noise limits when measured in accordance with the associated monitoring requirements.<br>Table - Noise limits

<tr><td>N5</td><td>Blasting activities must not exceed the limits for peak particle velocity and air blast overpressure in Table – Blasting noise limits when measured at any sensitive place or commercial place in accordance with the associated monitoring requirements.<br>Table – Blasting noise limits
<table>
<tr><th>Blasting criteria</th><th>Blasting limits</th></tr>
<tr><td>Airblast overpressure</td><td>115 dB (Linear) Peak for 9 out of 10 consecutive blasts initiated and not greater than 120 dB (Linear) Peak at any time.</td></tr>
<tr><td>Ground vibration peak particle velocity</td><td>5 mm/s peak particle velocity for 9 out of 10 consecutive blasts and not greater than 10 mm/s peak particle velocity at any time.</td></tr>
</table>
Associated monitoring requirements<br>1. Monitoring must be performed in accordance with the most recent edition of the administering authority's Noise and Vibration from Blasting guideline and Noise Measurement Manual and any relevant Australian Standard.<br>2. All monitoring devices must be calibrated and maintained according to the manufacturer’s instruction manual.</td></tr>
<tr><td>N6</td><td>Blasting must be carried out in accordance with the current edition of the administering authority's Noise and vibration from blasting guideline and with Australian Standard 2187.</td></tr>
<tr><td>N7</td><td>Unless prior approval is obtained from the administering authority:<br>1. blasting is only permitted during the hours of 9 am to 3 pm Monday to Friday, and from 9 am to 1 pm on Saturdays.<br>2. blasting is not permitted at any time on Sundays or public holidays.</td></tr>
<tr><td>N8</td><td>When required by the administering authority, a blast monitoring program must be developed and implemented to monitor compliance with Table - Blasting noise limits at any sensitive place or commercial place.</td></tr>
<tr><td colspan="2">Agency interest: Water</td></tr>
<tr><td>Condition number</td><td>Condition</td></tr>
<tr><td>WA1</td><td>Other than as permitted within this environmental authority, contaminants must not be released to any waters.</td></tr>
<tr><td>WA2</td><td>The only contaminants to be released to surface waters or land are settled treated stormwater runoff from areas of the site not likely to be contaminated with waste materials in accordance with Table - Surface water release limits and the associated monitoring requirements.</td></tr>
</table>

**Table - Surface water release limits**

| Release Point(s) Description (GDA2020) | | Quality characteristic (units) | Limit | Limit Type | Minimum Monitoring Frequency |
|---|---|---|---|---|---|
| **Latitude** | **Longitude** | | | | |
| -27.3885 | 152.3774 | pH | 6.5 – 8.0 | Range | Daily during release |
| | | Suspended Solids | 8 mg/L | Maximum | |
| | | Turbidity | 14 NTU | Maximum | |
| | | Electrical Conductivity | 200 µS/cm | Maximum | |
| | | Dissolved Oxygen | 85 – 110 % saturation | Range | |

**Associated monitoring requirements**

1. Monitoring must be in accordance with the methods prescribed in the current edition of the administering authority's *Monitoring and Sampling Manual.*
2. Water and sediment samples must be representative of the general condition of the water body or sediments.
3. All determinations must employ analytical practical quantification limits of sufficient sensitivity to enable comparisons to be made against water quality objectives/triggers/limits relevant to the particular water or sediment quality characteristic.
4. Monitoring must be undertaken during a release and at the frequency stated.
5. All monitoring devices must be calibrated and maintained according to the manufacturer's instruction manual.

| | |
|---|---|
| WA3 | The release to waters permitted under WA2 must not contain any other properties at a concentration capable of causing environmental harm. |
| WA4 | The release to waters permitted under WA2 must not produce any slick or other visible evidence of oil or grease, scum, litter or other visually objectionable matter. |
| WA5 | Stormwater that is not contaminated by the activity must be diverted away from areas where it may become contaminated by the activity. Stormwater that is contaminated by the activity must be directed to a treatment system. |

**Definitions**

Key terms and/or phrases used in this document are defined in this section. Where a term is not defined, the definition in the *Environmental Protection Act 1994*, its regulations or environmental protection policies must be used. If a word remains undefined it has its ordinary meaning.

**Activity** means the environmentally relevant activities, whether resource activities or prescribed activities, to which the environmental authority relates.

**Administering authority** means the Department of Environment and Science or its successor or predecessors.

**Airblast overpressure** is the energy transmitted from the blast site within the atmosphere in the form of pressure waves. As these waves pass a given position, the pressure of the air rises very rapidly then falls more slowly then returns to the ambient value after a number of oscillations. The pressure wave consists of both audible (noise) and inaudible (concussion) energy. The maximum excess pressure in this wave is known as the peak air overpressure, generally measured in decibels using the linear frequency-weighting.

**Appropriately qualified person(s)** means a person or persons who has professional qualifications, training, skills or experience relevant to the EA requirement and can give authoritative assessment, advice and analysis in relation to the EA requirements using the relevant protocols, standards, methods or literature.

**Background** means noise, measured in the absence of the noise under investigation, as $\mathbf{L_{A\ 90,\ adj,\ T}}$ being the A-weighted sound pressure level exceeded for 90 per cent of the time period of not less than 15 minutes, using Fast response.

**Blasting** is the use of explosives to fracture:

- rock, coal and other minerals for later recovery; or
- structural components or other items to facilitate removal from a site or for reuse.

**Commercial place** means a place used as a workplace, an office or for business or commercial purposes and includes a place within the curtilage of such a place reasonably used by persons at that place.

**Disturbed areas** includes areas:

1. that are susceptible to erosion;
2. that are contaminated by the activity; and/or
3. upon which stockpiles of soil or other materials are located.

**Environmental nuisance** as defined in Chapter 1 of the *Environmental Protection Act 1994*.

**Environmental offset** has the meaning defined in the *Environmental Offsets Act 2014*.

**Environmental value –**

- a quality or physical characteristic of the environment that is conducive to ecological health or public amenity or safety; or
- another quality of the environment identified and declared to be an environmental value under an environmental protection policy or regulation.

**Groundwater** means water that occurs naturally in, or is introduced artificially into, an aquifer.

**Koala suitable species** means tree species which will provide shelter and/or food for Koalas living in or moving through an area.

**Land** means any land, whether above or below the ordinary high-water mark at spring tides (i.e. includes tidal land).

**Land-based environmental offset** has the same meaning as 'proponent-driven offset' in the *Environmental Offsets Act 2014*.

$\mathbf{L_{Aeq,\ adj,\ T}}$ means the adjusted A weighted equivalent continuous sound pressure level measured on fast

response, adjusted for tonality and impulsiveness, during the time period T, where T is measured for a period no less than 15 minutes when the activity is causing a steady state noise, and no shorter than one hour when the approved activity is causing an intermittent noise.

**$Max_{LpA,T}$** means the maximum A-weighted sound pressure level measured over a time period T of not less than 15 minutes, using Fast response.

**Measures** has the broadest interpretation and includes:

- Procedural measures such as standard operating procedures for dredging operations, environmental risk assessment, management actions, departmental direction and competency expectations under relevant guidelines
- Physical measures such as plant, equipment, physical objects (such as bunding, containment systems etc.), ecosystem monitoring and bathymetric surveys.

**NATA** means National Association of Testing Authorities.

**Nominated delegate** means another government agency that provides services to the administering authority.

**Noxious** means harmful or injurious to health or physical well-being.

**Offensive** means causing offence or displeasure; is unreasonably disagreeable to the senses; disgusting, nauseous or repulsive.

**Records** include breach notifications, written procedures, analysis results, monitoring reports and monitoring programs required under a condition of this authority.

**Release of a contaminant into the environment** means to:

1. deposit, discharge, emit or disturb the contaminant
2. cause or allow the contaminant to be deposited, discharged, emitted or disturbed
3. fail to prevent the contaminant from being deposited, discharged emitted or disturbed
4. allow the contaminant to escape
5. fail to prevent the contaminant from escaping.

**Secondary containment system** means a system designed, installed and operated to prevent any release of contaminants from the system, or containers within the system, to land, groundwater, or surface waters.

**Sensitive place** includes the following and includes a place within the curtilage of such a place reasonably used by persons at that place:

1. a dwelling, residential allotment, mobile home or caravan park, residential marina or other residential premises; or
2. a motel, hotel or hostel; or
3. a kindergarten, school, university or other educational institution; or
4. a medical centre or hospital; or
5. a protected area under the *Nature Conservation Act 1992*, the *Marine Parks Act 2004* or a World Heritage Area; or
6. a public park or garden; or
7. for noise, a place defined as a sensitive receptor for the purposes of the Environmental Protection (Noise) Policy 2019.

**Stormwater that is not contaminated by the activity** includes stormwater runoff from external or undisturbed catchments.

**Substantial low frequency noise** means a noise emission that has an unbalanced frequency spectrum shown in a one-third octave band measurement, with a predominant component within the frequency range 10 to 200 Hz. It includes any noise emission likely to cause an overall sound pressure level at a sensitive place exceeding 55 dB(Z).

**Vibration** is the oscillating or periodic motion of a particle, group of particles, or solid object about its equilibrium position.

**Waters** includes river, stream, lake, lagoon, pond, swamp, wetland, unconfined surface water, unconfined water, natural or artificial watercourse, bed and bank of any waters, dams, non-tidal or tidal waters (including the sea), stormwater channel, stormwater drain, roadside gutter, stormwater run-off, and groundwater and any part thereof.

**You** means the holder of the environmental authority.

## Appendix 2

**Table 2 –** Permitted impact area coordinates

| **GDA 2020 Coordinate Table** | |
|---|---|
| *Permitted Impact Area 1* | |
| Latitude | Longitude |
| -27.3867 | 152.3754 |
| -27.3875 | 152.3754 |
| -27.3873 | 152.3756 |
| -27.3879 | 152.3754 |
| -27.3878 | 152.3752 |

| **GDA 2020 Coordinate Table** | |
|---|---|
| *Permitted Impact Area 2* | |
| Latitude | Longitude |
| -27.3765 | 152.3772 |
| -27.3770 | 152.3772 |
| -27.3804 | 152.3766 |
| -27.3813 | 152.3764 |
| -27.3815 | 152.3764 |
| -27.3817 | 152.3763 |

| **GDA 2020 Coordinate Table** | | Latitude | Longitude | Latitude | Longitude |
|---|---|---|---|---|---|
| *Permitted Impact Area 3* | | -27.3780 | 152.3802 | -27.3787 | 152.3787 |
| Latitude | Longitude | -27.3779 | 152.3806 | -27.3788 | 152.3787 |
| -27.3769 | 152.3795 | -27.3779 | 152.3807 | -27.3786 | 152.3788 |
| -27.3772 | 152.3799 | -27.3782 | 152.3803 | -27.3781 | 152.3790 |
| -27. 3774 | 152.3803 | -27.3784 | 152.3797 | -27.3779 | 152.3792 |
| -27.3775 | 152.3805 | -27.3784 | 152.3797 | -27.3775 | 152.3792 |
| -27.3775 | 152.3801 | -27.3783 | 152.3794 | -27.3775 | 152.3791 |
| -27. 3775 | 152.3800 | -27.3785 | 152.3793 | -27.3771 | 152.3794 |
| -27.3777 | 152.3799 | -27.3787 | 152.3793 | | |
| -27.3779 | 152.3800 | -27.3792 | 152.3792 | | |
| -27.3780 | 152.3800 | -27.3792 | 152.3790 | | |
