PL94 TEP Submission: Dawson Dam Rehabilitation Completion

David,

As per TEP (EHP Reference: Petroleum Lease (PL) 94 Transitional Environmental Program – 358477/BNE40048-5 – Amendment – MAN18280) for Environmental Authority for PL94 this correspondence is in relation to information in relation to action numbers as listed below:

#	Task / Title	Action	KPI / Detail of Action	Original or Amendment (A),(B) (C) & (D) Completion Dates	Amendment (E) Completion Date
41	Dawson Dam: Rehabilitation Works Physical Completion and Completion Report	Full rehabilitation and remediation of Dawson Dam	Milestone Report: Containing: Submit soil contamination investigation, rehabilitation report, and contamination validation sampling results landholder agreement; or Written notification of completed earthworks and supporting photographs	31 December 2016 (D)	31 December 2017 (E)

This notification is to provide your office with the formal notification that rehabilitation works of Dawson Dam has been physically completed. A rehabilitation completion report has been written and provided with this submission as has photo evidence of the Dawson Dam condition as of Tuesday 28th November 2017. The Dawson Dam revegetation is progressing well and Westside shall now monitor this rehabilitated Dam until handover to the landholder at an agreed time in the future. This is the final submission required of this TEP.

Please do not hesitate to contact me for clarification in regards to any of the content of this submission.

Yours sincerely,

Russell Churchett
