

PRCP schedule

Environmental Protection Act 1994

PRCP schedule P-PRCP-100728000

This is the approved form for a PRCP schedule issued by the administering authority under Chapter 5 of the Environmental Protection Act 1994.

PRCP schedule: P-PRCP-100728000

PRCP schedule holder(s)

Name(s)	Registered address
Graymont (NSW) Pty Ltd	Level 9, 118 Mount Street NORTH SYDNEY NSW 2060

Location details

Location(s)
ML5764, ML5763

Take effect

In accordance with section 202B of the *Environmental Protection Act 1994* (EP Act), the PRCP schedule has effect on the day the environmental authority for carrying out relevant activities on land to which the schedule relates takes effect. Pursuant to section 202C of the EP Act, a PRCP schedule continues in force until the environmental authority for the relevant activities to which the PRCP schedule relates is cancelled or surrendered, even if the resource tenure expires or is cancelled and even if the relevant environmental authority is suspended under Chapter 5, part 11 or 11A of the EP Act.

Signature

Obligations under the *Environmental Protection Act 1994*

Pursuant to section 202E of the EP Act, if there is an inconsistency between an environmental authority and a PRCP schedule, the environmental authority prevails to the extent of the inconsistency.

Pursuant to section 285 of the EP Act:

- the holder of a PRCP schedule must commission an audit of the schedule by a rehabilitation auditor for the following periods (each an audit period) —
 - (a) the 3-year period starting on the day the schedule takes effect
 - (b) each 3-year period starting on the day after the previous audit period ended.
- the holder must, within 4 months after the end of each audit period, give the administering authority -
 - (a) the rehabilitation auditor's report (an audit report) about the audit that complies with section 286 of the EP Act, and
 - (b) a declaration for the audit report that complies with section 285 of the EP Act.

In addition to the requirements found in the conditions of this PRCP schedule, the holder must also meet their obligations under the environmental authority, the EP Act, and the regulations made under the EP Act. For example, the holder must comply with the following provisions of the EP Act:

- general environmental duty (section 319)
- duty to notify environmental harm (section 320-320G)
- offence of causing serious or material environmental harm (sections 437-439)
- offence of causing environmental nuisance (section 440)
- offence of depositing prescribed water contaminants in waters and related matters (section 440ZG)
- offence to place contaminant where environmental harm or nuisance may be caused (section 443).

PRCP schedule

The PRCP schedule incorporates the following sections:

- Section A - Conditions of PRCP schedule
- Section B - Final site design and reference maps
- Section C - Post mining land uses

Section A - Conditions of PRCP schedule

Pursuant to section 206A of the EP Act:

- it is a condition of this PRCP schedule that, in carrying out a relevant activity under the schedule, the holder must comply with a requirement stated in the environmental authority relevant to carrying out the activity.
- it is a condition of this PRCP schedule that the holder must comply with the following matters stated in the schedule -
 - (a) each rehabilitation milestone and management milestone
 - (b) when each rehabilitation milestone and management milestone is to be achieved

General conditions

PRCP1 The holder must comply with each milestone criteria stated in the schedule.

PRCP2 Where a milestone criterion requires any of the following, the holder must keep records of the actions taken to comply with the criterion as well as the results and provide a copy of this information to the Administering Authority on request –

- (i) certifications or assessments to be undertaken;
- (ii) monitoring or maintenance to be carried out;
- (iii) final design plans and/or specifications to be developed; and
- (iv) reports such as contaminated land investigations, rehabilitation reports (including monitoring records), validation reports, Quality Assurance/Quality Control reports.

PRCP3 Where land becomes available for rehabilitation earlier than the nominated 'Date area is available', progressive rehabilitation for that land must commence as soon as practicable. Progressive rehabilitation commenced early under this condition must be carried out in accordance with the milestones and criteria in this schedule, except that each of the dates by which milestones are to be completed is brought forward by the same amount of time as the commencement was brought forward.

END OF CONDITIONS

Section B - Final site design and reference maps

Figure 1 – Final Site Design

Figure 2 – Rehabilitation areas – Marmor

Section C – Post mining land uses

(RA1) Rehabilitation area 1

Post-mining land uses (PMLU)					
Rehabilitation area	RA1				
Relevant activities	ROM Pad, Laydown Area and Product Stockpiles				
Total rehabilitation area size (ha)	1.09				
Commencement of first milestone: RM1	10/12/2030				
PMLU	Low Intensity Grazing				
Date area is available	10/12/2030	10/12/2034	10/12/2036	10/12/2038	10/12/2043
Cumulative area available (ha)	0.06	1.09	1.09	1.09	1.09
Milestone completed by	10/12/2034	10/12/2036	10/12/2038	10/12/2043	10/12/2053
Milestone Reference	Cumulative area achieved (ha)				
RM1*	0.06				
RM4		1.09			
RM5		1.09			
RM6			1.09		
RM7				1.09	
RM9					1.09
*Only applies to a portion of RA1 occupied by limestone and coal stockpiles					

(RA2) Rehabilitation area 2

Post-mining land uses (PMLU)					
Rehabilitation area	RA2				
Relevant activities	Infrastructure (Buildings/Water Tanks)				
Total rehabilitation area size (ha)	0.07				
Commencement of first milestone: RM1	10/12/2030				
PMLU	Low Intensity Grazing				
Date area is available	10/12/2030	10/12/2034	10/12/2036	10/12/2038	10/12/2043
Cumulative area available (ha)	0.07	0.07	0.07	0.07	0.07
Milestone completed by	10/12/2034	10/12/2036	10/12/2038	10/12/2043	10/12/2053
Milestone Reference	Cumulative area achieved (ha)				
RM1	0.07				
RM4		0.07			
RM5		0.07			
RM6			0.07		
RM7				0.07	
RM9					0.07

(RA3) Rehabilitation area 3

Post-mining land uses (PMLU)					
Rehabilitation area	RA3				
Relevant activities	Infrastructure (Process Plant/Hydrocarbon Storage)				
Total rehabilitation area size (ha)	0.28				
Commencement of first milestone: RM1	10/12/2030				
PMLU	Low Intensity Grazing				
Date area is available	10/12/2030	10/12/2034	10/12/2036	10/12/2038	10/12/2043
Cumulative area available (ha)	0.28	0.28	0.28	0.28	0.28
Milestone completed by	10/12/2034	10/12/2036	10/12/2038	10/12/2043	10/12/2053
Milestone Reference	Cumulative area achieved (ha)

RM5		0.28			
RM6			0.28		
RM7				0.28	
RM9					0.28

(RA4) Rehabilitation area 4

Post-mining land uses (PMLU)					
Rehabilitation area	RA4				
Relevant activities	Sediment Dam				
Total rehabilitation area size (ha)	0.11				
Commencement of first milestone: RM1	10/12/2030				
PMLU	Low Intensity Grazing				
Date area is available	10/12/2030	10/12/2034	10/12/2036	10/12/2038	10/12/2043
Cumulative area available (ha)	0.11	0.11	0.11	0.11	0.11
Milestone completed by	10/12/2034	10/12/2036	10/12/2038	10/12/2043	10/12/2053
Milestone Reference	Cumulative area achieved (ha)				
RM1	0.11				
RM3	0.11				
RM4		0.11			
RM5		0.11			
RM6			0.11		
RM7				0.11	
RM9					0.11

(RA5) Rehabilitation area 5

Post-mining land uses (PMLU)					
Rehabilitation area	RA5				
Relevant activities	Laydown Area (surrounding offices and Process Plant)				
Total rehabilitation area size (ha)	1.68				
Commencement of first milestone: RM1	10/12/2030				
PMLU	Low Intensity Grazing				
Date area is available	10/12/2030	10/12/2034	10/12/2036	10/12/2038	10/12/2043
Cumulative area available (ha)	1.68	1.68	1.68	1.68	1.68
Milestone completed by	10/12/2034	10/12/2036	10/12/2038	10/12/2043	10/12/2053
Milestone Reference	Cumulative area achieved (ha)				
RM1	1.68				
RM4		1.68			
RM5		1.68			
RM6			1.68		
RM7				1.68	
RM9					1.68

(RA6) Rehabilitation area 6

Post-mining land uses (PMLU)			
Rehabilitation area	RA6		
Relevant activities	Vegetation Disturbance Area		
Total rehabilitation area size (ha)	0.54		
Commencement of first milestone: RM6	10/12/2036		
PMLU	Low Intensity Grazing		
Date area is available	10/12/2036	10/12/2038	10/12/2043
Cumulative area available (ha)	0.54	0.54	0.54
Milestone completed by	10/12/2038	10/12/2043	10/12/2053
Milestone Reference	Cumulative area achieved (ha)		
RM6	0.54		
RM7		0.54	
RM9			0.54

(RA7) Rehabilitation area 7

Post-mining land uses (PMLU)				
Rehabilitation area	RA7			
Relevant activities	Unsealed Tracks			
Total rehabilitation area size (ha)	0.40			
Commencement of first milestone: RM4	10/12/2034			
PMLU	Low Intensity Grazing			
Date area is available	10/12/2034	10/12/2036	10/12/2038	10/12/2043
Cumulative area available (ha)	0.40	0.40	0.40	0.40
Milestone completed by	10/12/2036	10/12/2038	10/12/2043	10/12/2053

RM4	0.40			
RM5	0.40			
RM6		0.40		
RM7			0.40	
RM9				0.40

(RA8) Rehabilitation area 8

Post-mining land uses (PMLU)				
Rehabilitation area	RA8			
Relevant activities	Site Entrance Tracks			
Total rehabilitation area size (ha)	0.34			
Commencement of first milestone: RM1	10/12/2038			
PMLU	Low Intensity Grazing			
Date area is available	10/12/2038	10/12/2040	10/12/2042	10/12/2047
Cumulative area available (ha)	0.34	0.34	0.34	0.34
Milestone completed by	10/12/2040	10/12/2042	10/12/2047	10/12/2053
Milestone Reference	Cumulative area achieved (ha)			
RM1	0.34			
RM4	0.34			
RM5	0.34			
RM6		0.34		
RM7			0.34	
RM9				0.34

(RA9) Rehabilitation area 9

Post-mining land uses (PMLU)				
Rehabilitation area	RA9			
Relevant activities	Topsoil Stockpiles			
Total rehabilitation area size (ha)	0.46			
Commencement of first milestone: RM4	10/12/2034			
PMLU	Low Intensity Grazing			
Date area is available	10/12/2034	10/12/2036	10/12/2038	10/12/2043
Cumulative area available (ha)	0.46	0.46	0.46	0.46
Milestone completed by	10/12/2036	10/12/2038	10/12/2043	10/12/2053
Milestone Reference	Cumulative area achieved (ha)			
RM4	0.46			
RM5	0.46			
RM6		0.46		
RM7			0.46	
RM9				0.46

(RA10) Rehabilitation area 10

Post-mining land uses (PMLU)			
Rehabilitation area	RA10		
Relevant activities	Residual Void (Pit Lake)		
Total rehabilitation area size (ha)	0.69		
Commencement of first milestone: RM2	10/12/2030		
PMLU	Water Storage - Pit lake		
Date area is available	10/12/2030	10/12/2034	10/12/2043
Cumulative area available (ha)	0.12	0.69	0.69
Milestone completed by	10/12/2034	10/12/2043	10/12/2053
Milestone Reference	Cumulative area achieved (ha)		
RM2*	0.12		
RM8		0.69	
RM10			0.69
*Only applies to the portion of RA10 occupied by mixed lime kiln dust, coal ash and reject limestone waste stockpiles			

(RA11) Rehabilitation area 11

Post-mining land uses (PMLU)			
Rehabilitation area	RA11		
Relevant activities	Residual Void (Catchment)		
Total rehabilitation area size (ha)	5.25		
Commencement of first milestone: RM4	10/12/2034		
PMLU	Water Storage – Catchment		
Date area is available	10/12/2034	10/12/2036	10/12/2043
Cumulative area available (ha)	5.25	5.25	5.25
Milestone completed by	10/12/2036	10/12/2043	10/12/2053
Milestone Reference	Cumulative area achieved (ha)		
RM4	5.25		
RM5	5.25		
RM8		5.25	
RM10			5.25

(RA12) Rehabilitation area 12

Post-mining land uses (PMLU)				
Rehabilitation area	RA12			
Relevant activities	Waste Stockpiles (In Void)			
Total rehabilitation area size (ha)	0.90			
Commencement of first milestone: RM2	10/12/2030			
PMLU	Water Storage – Catchment			
Date area is available	10/12/2030	10/12/2034	10/12/2036	10/12/2043
Cumulative area available (ha)	0.90	0.90	0.90	0.90

RM6			0.55		
RM7				0.55	
RM9					0.55

Rehabilitation area milestones

Milestone reference	Rehabilitation milestone	Milestone criteria
RM1	Infrastructure decommissioning and removal	1. a) All services disconnected in coordination with service providers and all associated service infrastructure removed from site. 1. b) All hazardous building materials removed by appropriately licensed contractors. 1. c) All infrastructure (buildings, sheds, fixed assets) demolished, and demolition waste removed from site for recycling or disposal at an appropriately licensed facility. 1. d) All limestone feed stock not to be used for surface water management structures removed from stockpiles in RA1 and placed in the void. 1. e) All coal removed from stockpiles in RA1 and disposed of at an appropriately licensed facility. 1. f) All bitumen in RA8 removed and disposed of at an appropriately licensed facility. 1. g) Sediment dam (RA4) water quality is analysed for total metals/metalloids (As, Cd, Cr, Cu, Ni, Pb, Se, Zn) and hydrocarbons as per suite B prior to dewatering. Results will be compared to ARMCANZ & ANZECC (2000) guidelines for stock water (cattle). 1. h) Sediment dam (RA4) dewatered.
RM2	Stockpiled reject and waste material removal	2. a) Mixed lime kiln dust, coal ash and reject limestone waste stockpiles have been removed. 2. b) Validation sampling by an AQP¹ confirms all waste material has been removed to a depth below ground level. This depth will demonstrate no soil contamination exists deeper in the soil profile in accordance with National Environment Protection (Assessment of Site Contamination) Measure 1999. 2. c) Waste classified and disposed off-site at an appropriately licensed facility.
RM3	Contaminated land assessment and remediation	3. a) Contaminated land investigation for all areas that are identified as containing a source of contamination undertaken by an AQP¹. 3. b) All contaminated material is to be removed from the site unless onsite remediation is being undertaken. 3. c) Contaminated material removed from site has been removed in accordance with relevant regulations. 3. d) A contaminated land investigation document has been prepared by an AQP¹, containing a site suitability statement confirming that land is not contaminated and is suitable for the proposed PMLU.
RM4	Landform development	4. a) An AQP¹ has confirmed that geotechnical stability of the residual void walls (i.e., a factor of safety value of ≥ 1.3) has been achieved. 4. b) Surface aggregate in RA1, RA5 and RA8 removed to a depth of 300 mm and placed in the floor of the residual void. 4. c) All temporary and permanent Erosion and Sediment Control Structures have been designed and installed with reference to Best Practice Erosion & Sediment Control series (IECA 2008). 4. d) Average slope of areas to be revegetated does not exceed 15% (RA1 - RA5, RA8, RA9, RA13). 4. e) Unsealed tracks (RA7) graded to conform to the surrounding landform.

		4. f) Sediment dam bund pushed into dam and levelled (RA4) and the final (consolidated) landform surface will be water shedding. 4. g) All bores decommissioned in accordance with the Minimum Construction Requirements for Water Bores in Australia (National Uniform Drillers Licensing Committee 2020).
RM5	Surface preparation	5. a) All areas to be revegetated ripped to a depth of 500 mm at 500-800 mm spacings (RA1 - RA5 , RA7 - RA9, RA13). 5. b) Haul roads/access tracks within the residual void (RA11) ripped to a depth of 500 mm at 500-800 mm spacings. The exposed void floor (RA12) has been scarified. 5. c) Prior to application, stockpiled topsoil or imported topsoil has been assessed by an AQP¹ to confirm it is suitable for target vegetation establishment. All sources and volumes of imported topsoil will be documented and locations where imported topsoil is used onsite recorded for reporting requirements. Source locations will exclude areas known to contain declared weeds (defined as a Category 2, 3, 4 or 5 restricted matter under the Biosecurity Act 2014). 5. d) Topsoil placed to an average depth of 150 mm (RA1 - RA5, RA7 - RA9, RA13). 5. e) Onsite and imported topsoils quality will be assessed by an AQP¹ and fertiliser / ameliorants applied at recommended rates prior to seeding for RA1 - RA5, RA7 - RA9, RA13. 5. f) Active soil erosion and development of rills and gullies is repaired prior to seeding.
RM6	Revegetation	6. a) Seeding with Black Spear Grass (<i>Heteropogon contortus</i>), Forest Bluegrass (<i>Bothriochloa bladhii</i> ssp. <i>glabra</i>) and Shrubby Stylo (<i>Stylosanthes scabra</i>) at a rate of 2 kg/ha each has been completed (RA1 - RA5, RA7 - RA9, RA13). 6. b) Pasture species germination and establishment have been assessed within 2 months of seeding. If any of the maintenance treatment triggers identified in Section 3.7.6 of the Marmor Operations Progressive Rehabilitation and Closure Plan have occurred, the maintenance treatments nominated in Section 3.7.6 of the Marmor Operations Progressive Rehabilitation and Closure Plan have been applied as required. 6. c) An AQP¹ has assessed the condition of existing vegetation (RA6) in relation to the nominated PMLU and any recommendations provided as a result of the assessment have been implemented.
RM7	Establishment of post-mining land use vegetation and surface conditions (grazing)	7. a) The rehabilitation monitoring program has been implemented. 7. b) Bare ground % is equivalent to at least a "fair" condition as defined by Future Beef (https://futurebeef.com.au/resources/land-condition/). 7. c) Native or introduced desirable palatable and productive species trending towards at least 50% of the vegetative ground cover. 7. d) Pasture standing biomass is >45% and trending towards 75% of average standing biomass of reference areas selected according to Section 3.7.1.1 of the <i>Marmor Operations Progressive Rehabilitation and Closure Plan</i>.

		7. e) The cover of declared plant pest species will be no more than one rating² greater than the average cover class recorded in reference areas selected according to Section 3.7.1.1 of the <i>Marmor Operations Progressive Rehabilitation and Closure Plan</i>. 7. f) No active³ gullies >1.0 m depth. 7. g) Any gullies <1.0 m >0.3m have shown progressive stabilisation (i.e., have become partly stabilised or stabilised⁴) over successive annual monitoring events. 7. h) Temporary Erosion and Sediment Control Structures removed.
RM8	Establishment of post-mining land use surface conditions (water storage)	8. a) Monitoring of the void crests and walls by an AQP shows that they have achieved long-term stability. 8. b) Vegetation cover is increasing in areas of the Water Storage - Catchment PMLU that have been scarified or received recovered aggregate to enhance Pit Lake water quality (RA11, RA12). 8. c) Pit Lake water quality physico chemical indicators do not exceed the trigger values for livestock (beef cattle) drinking water defined in Australian and New Zealand Guidelines for Fresh and Marine Water Quality – Volume 3 Primary Industries — Rationale and Background Information Sections 9.3.4 & 9.3.5 (ANZECC and ARMCANZ 2000) (RA10).
RM9	Achievement of post-mining land use to stable condition (grazing)	9. a) An assessment of carrying capacity by an AQP demonstrates a sustainable grazing outcome has been achieved. 9. b) No active gullies >0.3 m depth. 9. c) Bare ground % is equivalent to at least a “fair” condition as defined by Future Beef (Land condition - https://futurebeef.com.au/resources/land-condition/). 9. d) Native or introduced desirable palatable and productive species achieve at least 50% of the vegetative ground cover. 9. e) Pasture standing biomass is $\geq 75\%$ of reference areas selected according to Section 3.7.1.1 of the <i>Marmor Operations Progressive Rehabilitation and Closure Plan</i>. 9. f) The cover of declared plant pest species will be no more than one rating² greater than the average cover class recorded in reference areas selected according to Section 3.7.1.1 of the <i>Marmor Operations Progressive Rehabilitation and Closure Plan</i>.
RM10	Achievement of post-mining land use to stable condition (water storage)	10. a) An AQP has confirmed that geotechnical stability of the residual void walls (i.e., a factor of safety value of ≥ 1.3) has been achieved. 10. b) Access to the residual void is restricted by the installation of an appropriate abandonment barrier (bund and/or fence) located at least 10 m beyond the area potentially affected by void wall instability as specified in the Marmor Mine PRCP: Pit Geotechnical Report prepared for Graymont v1.1 prepared by Rocktest Consulting October 2022. 10. c) Safety signage designed in accordance with relevant Australian Standards erected at a minimum of 100 m intervals. 10. d) An AQP confirms that the residual void walls drain internally to the residual void. 10. e) Pit Lake water quality physico chemical indicators do not exceed the trigger values for livestock (beef cattle) drinking water defined in Australian and New Zealand Guidelines for Fresh and Marine Water

		Quality – Volume 3 Primary Industries — Rationale and Background Information Sections 9.3.4 & 9.3.5 (ANZECC and ARMCANZ 2000) (RA10). 10. f) Ground cover (including vegetation, litter, rock, cryptogam) of at least 50% achieved in areas of the Water Storage - Catchment PMLU that have been scarified or received recovered aggregate to enhance Pit Lake water quality (RA11, RA12). 10. g) The cover of declared plant pest species will be no more than one rating² greater than the average cover class recorded in reference areas selected according to Section 3.7.1.1 of the <i>Marmor Operations Progressive Rehabilitation and Closure Plan</i>.
--	--	---

1. AQP (appropriately qualified person) means a person who has professional qualifications, training, skills or experience relevant to the nominated subject matter and can give authoritative assessment, advice and analysis on performance relative to the subject matter using the relevant protocols, standards, methods or literature.
2. Where Ratings are defined in the State Rural Leasehold Land Strategy: Guidelines for determining land condition prepared by the Department of Natural Resources and Mines (DNRM). Version 3.0 July 2013.
3. Active as defined in the Australian Soil and Land Survey Field Handbook (3rd Edition), The National Committee on Soil and Terrain published by CSIRO Publishing 2009.
4. Partly stabilised and stabilised as defined in the Australian Soil and Land Survey Field Handbook (3rd Edition), The National Committee on Soil and Terrain published by CSIRO Publishing 2009.

END OF PRCP SCHEDULE
